FOREWORD

THE VIBRANT TRADITION of experimental music at U.C. San Diego is now almost half a century old. As UCSD celebrates its 50th anniversary during the 2010-11 academic year, the Department of Music is proud to present **Sonic Diasporas**, the first ever alumni festival and symposium. Our call for entries prompted a tremendous response and we are pleased to present this diverse array of events. We thank everyone who submitted a proposal as well as all of our participants, many of whom traveled great distances to be here. Sonic Diaporas provides a chance for us all to pause amid our hectic lives and consider the vast variety of gifted alumni who have helped the Department of Music achieve its reputation as one of the most innovative graduate music schools in the world. Our gratitude goes to all alumni who, through their work at UCSD and after graduation, have helped make this the wildly creative place that it is today---and that it always has been.

I wrote *Hockey Story* for Brazilian-Canadian pianist, Luciane Cardassi. Luciane had immigrated to Canada a couple of years beforehand and was interested in exploring the hockey culture of Canada. She was also looking for a piece that involved electronics and speaking or singing, which was a good fit for my compositional interests. A hockey theme is somewhat outside of my usual work, but I decided it would be a good challenge and provide me with some fresh perspectives.

The piece is in three movements, with texts made up of hockey terminology. The piece looks at a range of hockey experiences, from kids to pros, fans, excitement, disappointment, and so forth. Luciane plays a MIDI keyboard mounted on top of the piano, creating a counterpoint between the acoustic piano, computer-generated sounds (SuperCollider), and her voice.

The text is taken entirely from hockey terminology. I weave together short word-units in order to create a narrative that references what I see as aspects of the spirit of hockey, playing with both the meaning and sound of the words.

The *Audible Phylogeny of Lemurs* is the product of four years of prosimian primate research at the Duke University Lemur Center, where I have observed and recorded semi-free range lemurs and conducted playback studies. The DLC is the world’s largest lemur reserve, with generous, forested natural habitat enclosures and over 200 charismatic animals. This work would not be possible without the DLC’s knowledgeable staff.

The piece is based on a 1994 study by Joseph Macedonia and Katherin Stanger. The authors evaluated communication evidence to produce a phylogeny (analysis of species relationships). Comparing that study to a recent molecular phylogeny, I was struck by how well the earlier communication-based analysis held up, suggesting that, with proper context, the evolutionary story encoded in the vocalizations of modern animals is audible.

Part I deals with affiliative calls and a few mild agonistic calls and group alerts—calls associated with social interaction. My goal is to preserve and augment the calls’ natural characteristics, grouping and combining them to explicate relationships between calls of different species, making the phylogeny audible and the beauty and complexity of the calls accessible. The piece is assembled from many hours of recordings—a grunt here, a mew or wail there, occasionally a “scene.” Vocalizations are documented for context of emission, cross-referenced with the scientific literature, and cleaned, enhanced, edited, and spatialized to reveal their acoustic structures and phylogenetic relationships.
I am deeply indebted to biologist Joseph Macedonia, whose authoritative work on lemur vocalization is the basis for this piece. Explanatory notes: http://musictechnology.northwestern.edu/Mercer-Lemur-Phyl/START%20HERE.html

**Ancient Songs** for solo soprano
First song: Ancient Voices  
Composer: Koji Nakano (PhD '06)  
Performer: Stacey Fraser

*Ancient Songs* for solo soprano, commissioned by the Northeast Council of Teachers of Japanese and its 14th Annual Harumatsuri, was premiered at the opening ceremony by Stacey Fraser at the UNIS theater in New York City on March 25, 2008. The first song *Ancient Voices* (performed tonight) explores primitive singing. It demonstrates various vocal gestures, such as the hand trill, as well as cupping or covering the mouth. For the second song, *Ritual Song*, a soprano sings a repetitive melody inspired by Minyoo (a melismatic style of Japanese folk singing), while playing finger cymbals. The rhythmic patterns of finger cymbals celebrate the continuing friendship between Japan and the United States. The third song, *Lullaby for All*, is a tribute to the Japanese lullabies of my childhood. Throughout the piece, a soprano sings simple melodies while playing two chords continuously on a miniature electric keyboard. In the third song a mother croons a tender lullaby to her child. I am still at work on the second and third songs.

**Myth of Absence**  
Composer: Dana Reason (PhD ’02)  
Performers: Dana Reason (piano), Mark Dresser ('82, MA '86) (contrabass), Peter Valsamis (drums)

I. *Unmarked* by Allison Johnson (2008) and Dana Reason (2009): Biddy Mason was a slave who won her freedom when her master brought her to California, a free state, and then tried to leave for Texas. Biddy Mason became a midwife among other things, and was able to carefully amass a small fortune, buy property and became a founder of the AME church, but was buried in an unmarked grave. Reason expands upon an original work by Allison Johnson both compositionally and in real-time with bassist, Mark Dresser and drummer, Peter Valsamis.

II. *Moments with Clara* by Clara Schumann (1853) and Dana Reason (2009): Is based on Opus 21(1853-1855) by Clara Schumann and is part of a larger series titled “Myth of Absence” that re-introduces the creative and experimental voices of both historical and contemporary women composers in a solo and trio setting through recontextualization and real-time sampling and dialogue.

**Lecture/presentation on two scenes from “Carlota,” an opera in three acts**
Composer/librettist: Paul Davies (MA ‘84, PhD ‘88)

The opera is based on the true story of the unfortunate Charlotte of Belgium, who was Empress Carlota of Mexico during the period in Mexican history known as the French Intervention (1864-1867). The first scene to be discussed is from Act I, Scene 1. The second scene discussed is the ending of the opera.

I will show several film clips from Hollywood movies I have scored. I will explain my process and then engage in a few moments of Q&A if applicable.

**Sightlines: Collaborative Works by Stephen Blumberg and Rachel Clarke**
Stephen Blumberg (’84 BA, ’87 MA) and Rachel Clarke

Composer Stephen Blumberg and artist Rachel Clarke have been collaborating since they met in 2003. Their work involves a dynamic interplay of composed music and computer animation. Rachel and Stephen will talk about their shared projects and the evolving perspectives that inform this process.

**The International Women’s Electro acoustic Listening Room Project: 2002-2009**
From Voices on the Edge to Diverse Voices
Pamela Madsen (BM ‘84, MA ‘89, PhD ‘00)
NOTE: Presented by Jane Rigler

The International Women’s Electro acoustic Listening Room Project (WEALR) 2002-2009 featured day-long non-stop playback of works by women composers throughout the globe in electro acoustic music, as part of the Annual Festival of New Music at Cal State Fullerton, curated by composer-performer Pamela Madsen, now in its tenth season. The New Music Festival, originally conceived as a Women in New Music Festival, ran from 2002 to 2009 in this format featuring such composers as Pauline Oliveros, Meredith Monk, Pamela Z, Anne LaBerge, Jane Rigler, Nicole Mitchell, Tania Leon, Joan Tower and more. In 2010 the New Music Festival’s focus changed to an inclusive format focusing on Composer-Performers with a focus on different instrument/voice each year. This move to inclusive festival format incorporated works by women composers in equal measure along-side works by men and featured the listening room project as one of the events of a daylong Composer-Performer Symposium. Currently, now entitled the “World Electro acoustic Listening Room” this new project strives to present an inclusive, diverse sampling of different approaches to electronic music and serves as a space for collective reflection and communal listening, amidst an active, intense festival, full of concerts, workshops, lectures and panel discussions. I will discuss the original concept, history of WEALR, significant composers in this project, archived
resources and research on issues of “voice” within women in music technology and the WEALR’s evolution from exclusivity to inclusiveness.

**Accelerated Aesthetics: a Lexicon For New Forms of Time and Space in Media**  
Carol Vernallis (MA ’86, PhD ’94)  
Performers: Mary Oliver and Paul Morris

We’re on the crest of an international, densely branching, multi-parametric style in which sonic and visual features become heightened, reconfigured and accelerated. Causes for the new trends have been suggested by Bordwell and Elsaesser; while sociocultural contexts (“just in time” labor, global capital) seem influential, so too do technologies like free-downloadable and AVID editing software; mp3 to 5.1 surround-sound; digital intermediary and computer-generated imagery. The new stylistic changes have infiltrated and enabled transmedia exchange among film, music video, YouTube, and video games. (Films in this vein include THE BOURNE ULTIMATUM and MOULIN ROUGE; YouTube instances include “Hahaha” and “Chocolate Rain;” and in music video, Beyoncé and Lady Gaga’s “Telephone” and Gaga’s “Paparazzi” are strong examples.)

While many approaches can be deployed to understand these trends, I’ll provide a partial taxonomy of new transformations of time and space: 1) Hyper-Articulation; 2) Stutter and Reiteration; 3) Sharp Sectional Demarcations; 4) Time Distortion; 5) Multiple Temporalities; 6) All-at-once; 7) Bullet Time; 8) Convoluted and Extended Space; 9) Peripheral Vision; and 10) Deadness. With hyper-articulation, technologies make possible a fine level of nuance such that every frame or field of sound and image can be modulated; these can then be shaped into something that resembles a line, which extends on its own trajectory, at its own pace, within the work. I’ll demonstrate this in music videos like Justin Bieber’s “Somebody To Love,” films like TRANSFORMERS and DAY WATCH, and the soundtrack for the viral web clip “Old Spice Remix.” Peripheral vision, on the other hand, occurs in films like CHILDREN OF MEN and TRANSFORMERS, and Rihanna’s music video “Rude Boy.” Sharp sectional divisions are apparent in THE A-TEAM and Ke$ha’s music video “Dirty Picture.” One may feel tempted to say that these new depictions are not just technologically driven. They are practice texts for us to try out new forms of thought and experience. For example, sharp sectional demarcations may teach media consumers to bracket time intervals, an important technique when the borders between work and leisure have become blurred, while peripheral vision trains one to capture the array of inputs aligned with multitasking. If we might only emulate the spatial and temporal forms of contemporary media, we might succeed in an increasingly competitive, globally networked world.

**Cathedral 1947 for two pianos (1998/99)**  
(Impressions of Jackson Pollock)  
Composer: Paul Davies (MA ’94)  
Performer: duo runedako (Ruth Neville and Daniel Koppelman, piano)

*Cathedral 1947* is the name of a famous painting by the American Abstract Expressionist Jackson Pollock. It became the center of a certain amount of controversy when it was the subject of a symposium on modern art sponsored by Life magazine in 1948. The painting was criticized as “being suitable for wallpaper or a necktie”, and other condescending remarks. Some twelve years later, however, this painting and the never ending quality of many of Pollock’s works from the late 40’s and early 50’s began to be seen as providing fresh insight into the beauty of nature. With this viewpoint, Pollock’s “Cathedral,” with its cool, distant coloration exhibits a startling radiance and projects the “expression of a pure state.”
In my piece I have tried to capture certain impressions that Pollock’s work trigger in me and to put these in a musical context. The famous luminous skeins is one element that figures in my new work, but I am also fascinated by the painter’s handling of depth, his use of color, and his way of giving out the sense that the viewer is being drawn in to the painting as if in a vortex (cf. “Number 1A 1948” for example). Besides this, I returned to a technique I have used since my third piece for two pianos, “Titanic: from the ocean floor” (1989), in which numbers pertinent to the extra-musical subject matter become matrixes for rhythmic and formal unitary designs.--Paul Davies

rorondondo (1994)
Composer: Daniel Koppelman (PhD ’92)
Performer: duo runedako (Ruth Neville, PhD ’92, Daniel Koppelman, piano)

As suggested by its title, rorondondo is a rondo within a rondo. After an introductory improvisation, a seven-note theme is subjected to various transformations, including extension, transposition, canon, and simultaneous presentation at different tempi."

Improvisation (2010)
Extended Vocal Techniques Ensemble: Ann Chase, Edwin Harkins, Deborah Kavasch (PhD ’78), Philip Larson, Linda Vickerman
In absentia: Warren Burt, event organizer

The Extended Vocal Techniques Ensemble was an ORU (Organized Research Unit) in UCSD’s Center for Music Experiment from 1973-1979 and continued to present concerts nationwide until its swansong UCSD performance in 1983. Between 1974 and 1975, as a sextet, we made the Lexicon of Extended Vocal Techniques, a catalog of vocal resources, and performed both compositions and improvisations. From 1975 on, the group as a Quartet (Harkins, Kavasch, Larson, Vickerman) gave a number of concerts in a variety of locations, including tours to Europe, Canada, and throughout the United States. Improvisation was always part of the EVTE’s activities, and a number of these were recorded; even after a gap of 35 years, they still exhibit an amazing freshness, energy uninhibited joy of exploration. So now it’s 35 years later, and we’re gathering here, without rehearsal, to improvise once again. What you see on stage will be the first time we’ve been together as a group after all those years. It will be an exciting exploration, I’m sure!

Tower Sounds: Ancient Voices and Electronics
Composer: Shahrokh Yadegari (PhD ’04)

A multichannel live mix of an excerpt video from “Tower Sounds: Ancient voices and Electronics” performance on July 11 and 12, 2009, in Tower by Ann Hamilton on Nancy and Steven Oliver’s ranch in Sonoma County, California. This piece was originally commissioned by the Judah L. Magnes Museum as an installation piece called “Through Music” in honor of Cantor Reuben R. Rinder. “Through Music” and “Tower Sounds” were curated by Lawrence Rinder. This video has been dedicated to the brave people of Iran in their uprising following the June 2009 election.

Make Way for Ducklings (2010)
Composer: Ian Power (MA ‘09)
Performers: Ariana Lamon-Anderson, Ross Karre (MA ‘07, PhD ‘09), Frankie Martin, saxophones

Make Way for Ducklings is a piece about teaching, learning, and parenting. It is written for three performers of widely varying degrees of skill and musicianship. It is dedicated to my amazing parents, Allen Power and Eileen Hayes-Power, who first read me the Robert McCloskey book of the same name, and to whom my gratitude knows no bounds.

Stone Guitars for two electric guitars and four pre-recorded electric guitars (2010-2011)
Composer: Richard Carrick
Performers: Either/Or Duo (Richard Carrick and David Shively, electric guitars)

Stone Guitars is about immovability, strength in numbers, and how the individual can negotiate their way through such empowering restraints. Being primarily a pianist and composer, my work with recorded electric guitars began last summer with many hours improvising in my studio. I created long scale compositional structures (similar to my notated compositional work on “flow”) that I could literally improvise through one guitar track at a time. The two live guitar parts are organized in a similar manner, offering each player freedom in playing through a ‘blueprint’ of the composition.

Accord, for piano and percussion (2010)
Composer: Adam Greene (PhD ’03)
Performers: Shannon Wettstein (DMA ‘00), piano; Patti Cudd, (DMA ‘98), percussion

Accord, for percussion and piano, was written for Patti Cudd and Shannon Wettstein, longtime friends and colleagues, and current members of the Twin Cities ensemble Zeitgeist. The work takes its point of departure from the Oresteia of Aeschylus, particularly in the final scene of The Eumenides: the confrontation between Athena and the Furies. While this is an archetypal encounter of opposites, one inevitably seeks ways of identifying common ground. After all, that is the intent of Athena’s entreaties to the Furies, who threaten to lay waste to the land, precipitating a calamitous war (thank goodness this is only music). Still, the confrontation is elemental, visceral, and the Furies are irrational, so the notion of agreement is remote, even though moments of openness within the piece allow for periods of less fractious interaction. The Greek chorus, the Furies, returns again and again with a rant, frustrating Athena’s attempts at persuasion. How does one persuade another who refuses to listen?

Accord was given a jump-start during a residency at the UCROSS Foundation in Wyoming, and my attendance at the premiere (in Minnesota) was supported by a Subito grant from the American Composers Forum. Thanks go to Zeitgeist for including the work on their program, and most of all, to Patti and Shannon for their generosity and enthusiasm.

Pre-Composition for 8-channel tape (2002)
Composer: Mark Applebaum, (MA ‘92, PhD ‘96)

Pre-Composition is a piece for 8-channel tape. The sound source is merely my voice...or voices. Pre-Composition was commissioned by Electronic Music Midwest 2002.

**Glimpsed From Afar - Paul Dresher (2006)**
*for Quadrachord & Marimba Lumina*
Performers: Paul Dresher/Joel Davel Duo

*Glimpsed from Afar* is the second concert work created for this duo of invented instruments (the first was *In The Name(less)* from 2002). It was commissioned by the San Francisco Jewish Music Festival and premiered on the Festival in March 2006. In a different form, much of the music in the work was integrated into the live score for the collaboration with the Margaret Jenkins Dance Company on the dance work *A Slipping Glimpse*, which premiered in May 2006 in San Francisco. The creation and development of the work is indebted to percussionist Joel Davel, whose ideas and performance have been integral to both the composition and performance of the work.

As in *In The Name(less)* my compositional approach that combines, in much the same way as jazz or many non-classical traditions organize their forms, germinal composed materials (including live looping/layering and the technical manipulation of the sounds) and a predetermined sequence of distinct sections with substantial improvisational development within each of these sections. Perhaps this is reflective of my musical roots, which are in many improvised musical forms, from blues, through free(ish) jazz and into North Indian Classical music. While not sounding like any of these, these works share both a philosophical desire and emotional imperative that all these musics embody: the need to combine both freedom and structure, the rational (and expected) with the intuitive (and unexpected). The instruments are described in more detail below.
We also want to thank composer Roger Reynolds and percussionist Steven Schick for the concept of “oddities” that plays an important part in the work, as well has composer Mark Applebaum for the processing patch he created for his work for the Ensemble's Electro-Acoustic Band Martian Anthropology 8. We use an evolution of this patch for the opening of Glimpsed From Afar.

A Note About the Instruments:

The Quadrachord
The Quadrachord is an instrument invented in collaboration with instrument designer Daniel Schmidt as part of my music theater work Sound Stage. This work has a theatrical set that comprised entirely of invented large-scale musical instruments/sound sculptures. It was commissioned and premiered by the Minneapolis based new music ensemble Zeitgeist in June of 2001. Of all the instruments created for this production, the Quadrachord is to me the most compelling invention and the only one whose sonic attributes have continued to inspire me to explore and develop its compositional potential as both a live performance instrument and as a source for recorded and sampled sounds.

The instrument has a total string length of 160 inches (though smaller versions have been built), four strings of differing gauges but of equal length and an electric bass pick-up next to each of the two bridges. The instrument can be plucked like a guitar, bowed like cello, played like a slide guitar, prepared like a piano and hammered on like a percussion instrument. Because of the extremely long string length (relative to our conventional bowed and plucked instruments), and very low open string/fundamental pitch(es), the instrument is capable of easily and accurately playing the harmonic series up to the 24nd partial and higher. Thus it is a remarkable tool for exploring alternative tuning systems based on the harmonic series.

In live performance, I typically use the instrument in conjunction with live digital looping and various signal processing devices (most importantly an programmable graphic equalizer) that together allow me to build up complex multi-track layers, each of which is defined by a distinct timbre and spectral characteristics

The Marimba Lumina
A recent instrument design by synthesizer pioneer Don Buchla in collaboration with Joel Davel and Mark Goldstein, Marimba Lumina is a sophisticated electronic instrument that has more expressive control than a typical electronic keyboard. Modeled somewhat after its acoustic namesake, it is a dynamically sensitive electronic mallet controller that brings an extended vocabulary and range of expression to the mallet instrument family. Marimba Lumina's playing surface includes a traditionally arrayed set of electronic bars. Each bar is made up of two overlapping antennas that receive proximity information from each of the four mallets. This allows the Marimba Lumina to respond to new performance variables such as position along the length of each bars. In addition, each mallet is tuned to a unique frequency which allows one to program different instrumental responses for each mallet. This all augments the potential for expressive control with easily implemented pitch, volume and timbre modulation.

PAUL DRESHER
Paul Dresher is an internationally active composer noted for his ability to integrate diverse musical influences into his own coherent and unique personal style. He is pursuing many forms of musical expression including experimental opera and music theater, chamber and orchestral composition, live instrumental electro-acoustic chamber music performances, musical instrument invention and scores for theater, dance, and film. He has received commissions from the Library of Congress, Saint Paul Chamber Orchestra, Spoleto Festival USA, the Kronos Quartet, the San Francisco Symphony, California EAR Unit, Zeitgeist, Walker Arts Center, University of Iowa, Meet the Composer, and the American Music Theater Festival. He has performed or had his works performed throughout North America, Asia and Europe. Venues have included the Munich State Opera, the New York Philharmonic, the Festival d’Automne in Paris, the Brooklyn Academy of Music’s Next Wave Festival, the Minnesota Opera, Arts Summit Indonesia ‘95, Festival Interlink in Japan, and five New Music America
Festivals. His evening-length collaboration with choreographer Margaret Jenkins, THE GATES, premiered at Jacob's Pillow and opened the 1994 Serious Fun Festival at Lincoln Center. In addition to his many collaborations with Margaret Jenkins, Dresher has also worked extensively with many choreographers including Brenda Way/ODC San Francisco, Nancy Karp & Dancers, Wendy Rogers Dance Company, and Allyson Green Dance.

Upcoming projects include a song cycle for tenor John Duykers, commissioned by the Seattle Chamber players to premiere in May of 2005 and a Gerbode Commission from the San Francisco Chamber Orchestra, which will premiere in March of 2005.

His most recently-completed projects include Snow in June, a collaboration with playwright Charles Mee and director Chen Shi-Zheng, commissioned by the American Repertory Theatre, a collaboration with former Kronos Quartet cellist Joan Jeanrenaud on his cello concerto Unequal Distemperament and the music theater work Sound Stage, for which Dresher designed and constructed a stage full of large-scale invented musical instruments.

In 1993, Dresher premiered his Electro-Acoustic Band on a five-city tour of Japan as part of Festival Interlink. This ensemble performs the works of a broad range of contemporary composers utilizing a hybrid orchestration that combines both acoustic and electronic instrumentation. The Ensemble regularly tours the U.S. and has traveled to Europe and Indonesia. The Ensemble has also premiered the music for dance and theater collaborations with the Margaret Jenkins Dance Company, ODC San Francisco, and the John Adams/June Jordan/Peter Sellars production “I Was Looking at the Ceiling and Then I Saw the Sky.”

As Artistic Director of the Paul Dresher Ensemble, he has guided the creation of the “American Trilogy”, a set of experimental Operatic works that address different facets of American culture, in collaboration with writer/performer Rinde Eckert. The trilogy began with SLOW FIRE (1985-88), developed with POWER FAILURE (1988-89) and was completed in 1990 with PIONEER, a collaboration that includes visual artist Terry Allen, actress Jo Harvey Allen, tenor John Duykers and director Robert Woodruff.

Born in Los Angeles in 1951, Dresher received his BA in Music from U.C. Berkeley and his M.A. in Composition from U.C. San Diego where he studied with Robert Erickson, Roger Reynolds, Pauline Oliveros and Bernard Rands. He has had a long time interest in the music of Asia and Africa, studying Ghanaian drumming with C.K. and Kobla Ladzekpo, Hindustani classical music with Nikhil Banerjee as well as Balinese and Javanese music. Recordings of his works are available on the Lovely Music, New World (with Ned Rothenberg), CRI, Music and Arts, O.O. Discs, BMG/Catalyst, MinMax, Starkland and New Albion labels.

Mr. Dresher has served as a panelist for many state and national arts agencies including co-chairing the Composers Fellowship Panel for the Music Program at the NEA. He has also served on the Policy Overview panels for the Presenting and Commissioning and Advancement Programs at the NEA. He has served on panels for the Rockefeller Foundation, Pew Charitable Trust, California Arts Council, Association of Performing Arts Presenters, Arts International, Massachusetts Arts Council, and Meet The Composer. He was on the Board of Directors for the American Music Center from 1994 through 2000 and has been on the Board of Directors and the Music Curator for New Langton Arts, a multidisciplinary presenter in San Francisco since 1982.

DIAMANDA GALAS
Hailed as one of the most important singers of our time, Diamanda Galás has earned international acclaim for her highly original and politically charged performance works, as well as her memorable rendition of jazz and blues. A resident of New York City since 1989, she was born to Anatolian and Greek parents, who always encouraged her gift for piano. From early on she studied both classical and jazz, accompanying her father's gospel choir before joining his New Orleans-style band,
and performing as a piano soloist with the San Diego Symphony at 14.

In the 70s, Galás played piano in the improvisational scene around San Diego and Los Angeles with musicians such as Bobby Bradford, Mark Dresser, Roberto Miranda, Butch Morris, and David Murray. She made her performance debut at the Festival d’Avignon in 1979, where she sang the lead role in Vinko Globokar’s opera, *Un jour comme un autre*, based upon the Amnesty International documentation of the arrest and torture of a Turkish woman for alleged treason. While in France, she also performed Iannis Xenakis’s work with l’Ensemble Intercontemporain and Musique Vivante.

Galás first rose to international prominence with her quadrophonic performances of *Wild Women with Steak Knives* (1980) and the album *The Litanies of Satan* (1982). Later she created the controversial *Plague Mass*, a requiem for those dead and dying of AIDS, which she performed at Saint John the Divine cathedral in New York City and released as a double CD in 1991. In 1994, Led Zeppelin bassist John Paul Jones and Diamanda Galás sought each other out for a collaboration that resulted in the visionary rock album, *The Sporting Life*.

Over the past two decades, Galás’s wide range of musical and theatrical works have included *The Singer* (1992), a compilation of blues and gospel standards; *Vena Cana* (1993), exploring AIDS dementia and clinical depression; *Schrei 27* (1996), a radical solo piece for voice and ring modulators about torture in isolation; *Malediction and Prayer* (1998), a setting of jazz and blues as well as love and death poems by Charles Baudelaire, Pier Paolo Pasolini and Salvadoran guerrilla fighter and poet Miguel Huezo Mixco, occasionally fused with the virtuosic singing of the Amanes (improvised lamentation from Asia Minor); *La Serpanta Canta* (2004), a greatest-hits collection from Hank Williams to Ornette Coleman; and *Defixiones, Will and Testament* (2004), a 80-minute memorial tribute to the Armenian, Greek and Assyrian victims of the Turkish genocides from 1914-1923.

Galás has contributed her voice and music to Francis Ford Coppola’s film, *Dracula*, Oliver Stones’ *Natural Born Killers*, Spanish/Nicaraguan filmmaker Mercedes Moncada Rodriguez’s *El Immortal* (The Immortal), as well as films by Wes Craven, Clive Barker, Derek Jarman, Hideo Nakata, and many others. In 2005, Galas was awarded Italy’s first Demetrio Stratos International Career Award. Her much-anticipated CD, *Guilty Guilty Guilty*, a compilation of tragic and homicidal love songs, was released by Caroline in the U.S. and MUTE UK worldwide on April 1, 2008; *You’re My Thrill* was released in 2009.

**One More Hit**
Composer: Guy Obrecht (PhD ’08)

For five years, the GO Duo met in Erickson Hall on Sunday nights for a “hit”. They brought music they were working on and put it together across generic lines. Now located in different hemispheres, they are about to rekindle one more hit.

**Generations: An Improvisation Event**
In celebration of the strong tradition of improvised music at UCSD, this gathering brings together alumni of many different eras, from the early years right up to today, in a collective expression of spontaneous music-making.

Composer: Pat O’Keefe
Performers:
Cooper Baker, laptop
Anthony Burr, clarinet/bass clarinet
Ian Carroll, trombone
Joel Davel, electronic percussion
Paul Dresher, quadrachord
Eric Dries, piano

Two Pieces for Unaccompanied Violin (2001)
Konrad Festival Piece
D-G: Für Denise
Composer: James Phelan (b. 1931)
Performer: Victoria Martino, (MA ’83), violin

In the Austrian region of Salzburg is a village church (the Konradkirche) that hosts an annual contemporary music festival of international renown, directed by the noted composer, Martin Haselböck. Victoria Martino was invited to perform at the 2001 Konradfest, and she commissioned me to write a piece for the occasion.

The little-known Blessed Konrad was a powerful medieval (12th c.) abbot who ran afoul of the nobility and suffered a martyr’s death. The introduction and conclusion of my “Konrad Festival Piece” attempt to evoke a medieval feeling through the use of parallel fifths. The middle section, while based upon twelve-tone technique, nevertheless has a tonal effect. It conveys the flames that enveloped Konrad on the pyre but miraculously failed to consume him.
Denise Green is a well-known contemporary Australian artist living and working in New York. In 2001 she had a major exhibition at the Art Gallery of New South Wales in Sydney, Australia, and she invited Victoria Martino to perform at the opening. Victoria asked me to compose a short piece for the event, resulting in D-G: Für Denise. I allowed myself only the notes called “D” and “G,” as well their corresponding flats, sharps, double sharps and double flats, which turns out to encompass the chromatic scale, with the exception of “B” and “B-flat.” I was glad to give those overworked notes some time off, and Denise liked the piece as well. -- James Phelan

Die Klavierübung (gekürzte, revidierte Fassung) (2010)
for samples of pianos and other instruments
Composer: Steven Kazuo Takasugi, (PhD)

Die Klavierübung (gekürzte, revidierte Fassung) might be subtitled A Journey Through Falsehoods. There is no piano after all, there is no pianist playing, there is no practicing. Perhaps it is about the recorded piano samples, digitalized manifestations, that still believe they are a “real piano,” disembodied as they are, attempting to create for themselves some fiction in which they can believe they are still live, even beautiful. They gather themselves as if the pianist were still present and imagine he is sitting at the keyboard—“on the bench”—or leaning precariously forward, head under the top-lid, plucking and striking the strings in a variety of manners, bringing them to life. Ultimately, they flee from this fiction, from coerced roles of alienation, but from one falsehood to another, to find their own sonic bodies distorted beyond recognition. They seem strange: “What’s wrong with me?” This line of questioning has its consequences. This shortened, revised version for the UCSD Music Alumni Festival is essentially the third and fourth (last) movements of the original 2007-09 version.

Element Metal for piano solo (2009)
Composer: Yumiko Morita, (PhD ’06)
Performer: Chen-Hui Jen, piano

Element Metal was composed for one of the five-piece cycle of my recent composition for chamber music. The theme of the cycle is taken from the Chinese philosophy, “Yin Yang and the five elements”— wood, fire, earth, metal, and water. In Yin Yang, these elements are considered to be the essence of everything that is part of the dynamic process and cyclic movements of nature. For the solo piano piece, I chose the element “metal”. According to Yin Yang and the five elements, the element metal is assigned characteristics such as solidity, vitality, purification, dryness, grief, whiteness, among others. These characteristics are reflected in this piece as texture, rhythm, tempo, and structure. I composed this piece imagining that a lump of massive metal gradually weathers and breaks down into pieces by the force of nature, changing its texture from a solid mass to fine, dry sand. It represents the process of purification of nature, and at the same time, the grief of the decaying metal. Lastly, many thanks to Chen-Hui Jen for performing this challenging piece. - Yumiko Morita

Exit I.D. (2010)
Composer: Lukas Schulze, (MA ’95, PhD ’06)
Performer: Marion Garver, subcontrabass flute (MA ’99)

Exit I.D. for subcontrabass flute was written in 2010 for the excellent flutist (and good friend) Marion Garver. I was prompted to write the piece after learning of her fine work with low flutes, and the work is an initial exploration of the sonic resources of this beautiful instrument.
Clusters
Composer: Eric Lyon (PhD ‘91)

Clusters is electroacoustic piano music, constructed from piano samples publicly available from the University of Iowa Electronic Music Studios. The clusters in this work are tone groups in close proximity in either pitch space or pitch class space, presented simultaneously or linearly, generally in rapid succession. Special clusters include a single piano note treated as a cluster of adjustable partials, clusters within a critical band of human hearing, and clustered events in sparse, algorithmically designed impulse responses.

The distribution of the clusters to multiple origin points in space fosters changing perceptions of events that might otherwise present identical content. Certain passages are extended in order to allow room resonance to emerge as a further source of patterns imposed on a single cluster. The spatial aspect of Clusters is designed to create fundamentally different perceptions depending on whether the listener is situated in the center, or closer to the periphery. Some aspects of patterning can only be perceived clearly in the periphery, others only at the center of the space. The “sweet spot” in the room is not the ideal location, but rather one of multiple, equally valid locations for experiencing the work.

Clusters is dedicated to the memory of David Tudor.

40 Cryptograms (2006) - World Premiere
Composer: Mark Applebaum, (MA ‘92, PhD ‘96) (b. 1967)
Performers: Skin & Bones (Terry Longshore, MA ‘96, DMA ‘99; Brett Reed, MA ‘97, DMA ‘02, percussion)

I received 40 Cryptograms from Mark Applebaum in 2006 as a gift for my 40th birthday. Since meeting at UCSD in 1994, I have had the pleasure to work with Mark on many projects - premieres, commissions, recordings - and his music has always been among my favorites. The 40 bizarre glyphs and pictographs in the score are deliberately left undefined, to be articulated by the performer(s) according to personal interpretation, and truly blur the distinction between visual art and musical notation. I was deeply moved by his gift, and have been looking for the perfect performance opportunity in which to premiere it ever since. The UCSD Sonic Diasporas Festival seemed a fitting opportunity, and I am thrilled to present the premiere as a duo performance with Brett Reed, my longtime collaborator in percussion duo Skin & Bones, which also formed at UCSD in 1994. — Terry Longshore

Telematic Performance
Participants at UCSD: Mark Dresser, (’82, MA ’86); Shahrokh Yadegari, (PhD ’04); Jason Robinson, (MA ’00, PhD ’05); Michael Dessen
Participants via videoconferencing: Pauline Oliveros, Chris Chafe, (MA ‘77)

Telematic music is real-time performance via the internet by musicians in different geographic locations. This panel presents a range of perspectives on the telematic music medium. Mark Dresser, Shahrokh Yadegari, Jason Robinson and Michael Dessen will be at UCSD, with Pauline Oliveros joining remotely from Seattle and Chris Chafe from Stanford via videoconferencing. The panel will include audio/video excerpts from recent performances, as well as short presentations by each participant.

FIVE DEDICATIONS TO JÁNOS NÉGYESY AND PÄIVIKKI NYKTER
Performers: János Négyesy and Päivikki Nykter, violins

In the 25 years that they have been playing together, János Négyesy and Päivikki Nykter have built a reputation for performances of uncommon musicality, warmth, and insight. Their skill, their curiosity, and their deep mutual understanding have made them ideal interpreters of the new music that they have advocated so persuasively and with such commitment. János and Päivikki vividly project the characters of the works and communicate the joy and conversational freedom of their collaboration.--Erik Ulman

Treatise on the Veil (1993)
Composer: Mark Osborn (1969-2002), (’91, PhD ’00)

Inspiration for Treatise on the Veil began with a general attraction to Cy Twombly’s painting and related “studies” of the same name, and with a specific desire to continue to address questions of “relating”, easily focused by the fact of writing for a married couple! Relating has often become a metaphor in my compositions, manifested in the relationships of the performers to the sonic material, which they “own”, contribute to, or are alienated from. Thus, I focused on counterpoint, codependence and negation (veiling being one manifestation) as models of relationship, which have their life in the ways that they imbed themselves in one another, becoming to various degrees indiscernible as separate generalizations about relating. Beckett’s solutions (the juxtaposition of syntactical units) to the difficult question of narrative, particularly in his late work, were especially influential in helping me give form to this “dialogue of relation”. In order to allow this dialogue to emerge with its due complexity in music, though, I felt that the material had to be exceedingly “pared down”, the focus lying for the most part in the single sound. I am interested to find whether this is the inherent flaw in my desire to focus on
relating…will any attempt to sharpen the image cause the resolution to change to something more tangible?--MO

**Blood & Water** (2010) (Premiere)
Composer: Steed Cowart, (MA ’82, PhD ’92)

*Blood and Water* was composed for violinists János Négyesy (Hungarian) and Päiviikki Nykter (Finnish). Hungarian and Finnish belong to the same linguist family (Uralic). I had tried to find a title somehow based on shared words. Over dinner at Alan and Evelyn Johnson’s home in San Francisco I told János and Päiviikki my idea for a title. They began listing through words they could think of that are similar in both languages. Together we came up with *Blood and Water* (Vér és Víz/Veri ja Vesi). I am very happy to have *Blood and Water* premiered at UCSD.--SC

**Short Circuits, Book III** (1998)
Composer: Igor Korneitchouk, (PhD ’87)

Of *Short Circuits* Korneitchouk says, “What is a musical instrument but a mechanical device that produces sound? Once we’ve established that fact, most concerns regarding the ‘preparations of violins’ should indeed evaporate (and, delightfully, here at UCSD there are no such concerns!). In my *Short Circuits* the two violins are engaged in a music of sound effects. It is a set of works that may seem ‘broken’ or full of accidental noises, very quiet, made up of very short pieces. By the time one catches on to its small ‘space’ it may be half over. The violins are ‘prepared’ with objects such as a paper clip, chopsticks, a Post-it, etc. constantly altering the sound of the violins. Because all the effects must come from a limited number of strings, the preparation is mutable: throughout the piece the performers are constantly preparing and re-preparing their instruments.” The complete set of 20 pieces in three volumes, started in 1995 and completed in 1998, is dedicated to János and Päiviikki. Book III consists of the last 6 of these pieces.--IK

**Hermitage** (2007)
Composer: Lukas Schulze, (MA ‘95, PhD ‘06)

*Hermitage* is imagined as a series of scenes, each one identified by its own poetic, sensual, and temporal identity. These are moved through by each player, though the scenes do not necessarily align in their outer boundaries with respect to the performers. The work is named for, among other things, a street in Chicago, where I found a rhythm inscribed in the sidewalk (no lie) that figures in one of the sections of the piece.

This piece was written for and in collaboration with János Négyesy and Päiviikki Nykter, whom I have known since arriving at UCSD in 1991. They have been, during this project, the same as they have in previous ones: gracious, solicitous, and encouraging, with only the most thoughtful responses to my questions and concerns. They remain two friends for whom I am wholly grateful. --LS

**Négyesy's Gallery** (2001)
Eight duo for two violins with computer paintings by János Négyesy
Composer: Drake Mabry, PhD

In August of 1998 my wife, Catherine, and I spent a couple of days visiting with my former composition teacher Will Ogdon in Del Mar at the end of a two week visit to California. One day I suggested we pass by the UCSD campus so I could show Catherine where I did my Doctoral studies. As we were walking near the music department we heard a violin playing in the distance. We followed the sound until we ended up at János’ studio. It was Päiviikki who had been playing. Fifteen years had passed since I last saw János and what a joy it was to see his beaming smile. After introducing us to Päiviikki we all talked about what we had been doing for the past fifteen years and the conversation eventually lead to the idea of my writing a duo for the two of them. Years earlier I had thought of writing for János but despite some initial sketches nothing
had progressed further. I expressed my enthusiasm for the idea and we parted with the idea of thinking about what form this project would take. Several months after returning to France I received a packet from János which included a booklet with twelve of his computer paintings. I had already seen some of his work during our visit in San Diego and as with those paintings I was struck by the beauty and power of the twelve he sent me. I looked at them often during the next couple of weeks and finally called János and told him I would like to write the duos based on these paintings. János graciously agreed and I immediately embarked on writing the duos. The paintings inspired me in many ways; sometimes a painting would propose an overall feeling, others a specific compositional technique, others a mysterious labyrinth which I would follow until the exit presented itself. It’s been a joy for me to write these pieces and a joy to know that with artists like János and Päivikki there is no limit technically or musically to what I want to do as a composer. This freedom was also inspirational for me. --DM

CALLIOPE 10TH ANNIVERSARY PROJECT
Performers: Calliope Duo: Elizabeth McNutt (MA ‘94, DMA 2000), flute, and Shannon Wettstein, (DMA ’00), piano

In celebration of the tenth anniversary of Calliope, their flute and piano duo, flutist Elizabeth McNutt and pianist Shannon Wettstein commissioned miniature works of one to one and a half minutes in duration from composers the duo first met as students at UCSD. Calliope was founded in 2000 at UCSD.

---Please hold applause until the end of the set---

Haiku#1 for piano and flute (2010)
Composer: Francois Rose, (PhD ’97)

Haiku #1 (2010) for flute and piano was written for the Calliope Duo (Elizabeth McNutt, flute and Shannon Wettstein, piano).
For this work I have been inspired by the fact that within the span of its seventeen syllables, a haiku has to give an impression of time and space. So the poetry of this work rests on a simple motive of three pitches that have been either stretched or compressed and presented on various timbral grounds.

offerings (2010)
Composer: Juan Campoverde, (PhD ’01)

This is Me in Transition (2010)
Allison Johnson, (PhD ’03)

This Is Me In Transition re-imagines material, once and future, this time conjured for the wonderful Calliope Duo. Material is distilled, displaced, and converted, galvanized by pulse points and pitch-mapping ignitions. The work is conceived at the margins and then moves inward, toward a culminating point re-jiggered from previous understandings. Intention endures: ad rem and ad astra.

Calli for flute and piano (2010)
Composer: Andrew May, (PhD ’00)

Calli begins “Calliope” and hearkens back to the two-syllable titles of several works of Donatoni, including the Calliope Duo’s signature piece, Fili. Lose an “L” and Cali begins California, where I met and began writing lots of music for Elizabeth and Shannon. Change “C” to “K” and Kali is the Black One of Hindu religion, who brings the end of time - lovingly and maternally, of course, dancing wildly and getting drunk on the blood of slain enemies. Maybe we’ll need more movements
to convey all of that, but this is at least a start.

**7 Collections** (2010)
Composer: Derek Keller, (PhD ’94)

*une for flute and piano* (2010)
Composer: Richard Carrick

*une* is about the flow of a single melody passing through micro-tonal, metric, rhythmic and intervalic obstacles, unifying the flute and piano into a single ‘meta-instrument.’

**A Diffuse Obtainable**
Composer: Eric Simonson, (PhD ’99)

This miniature was composed for Elizabeth McNutt and Shannon Wettstein on the occasion of the 10th anniversary of Calliope, their flute and piano duo. It is intended that the title elicit a sense of irony, insofar as something that dissolves, breaks up, or scatters is generally thought to be less obtainable. In music, though, in that moment of dissolution we often find momentary comprehensibility.

**Styx** for flute and piano (2010)
Composer: Erik Ulman, (’92, MA ’94, PhD ’00)

*Styx* was written in the summer of 2010 for my old friends in Calliope, with thanks and much affection; it is named for a poem by Else Lasker-Schüler:

O, ich wollte, daß ich wunschlos schlief,  
Wüßt ich einen Strom, wie mein Leben so tief,  
Flösse mit seinen Wassern.

**Danse d’été** (Inflorescence III) for flute and piano (2010)
Composer: Josh Levine, (MA ‘94, PhD ‘02)

*Danse d’été* (Inflorescence III) is the latest in an open-ended series of pieces that bear the subtitle “Inflorescence,” here signifying the process of flowering. (A happy memory: Elizabeth McNutt and Vanessa Tomlinson were early champions of the first Inflorescence piece, *Points of no return*, for flute and percussion, which had grown directly out of my first jury piece at UCSD.) The pieces do not form a series in the sense that they are meant to be heard in succession; rather, they share two particular attributes that distinguish them from most of my compositions. One of these commonalities is that their germinal pitch resources consist of, or, at least, refer to, borrowed material. In the first piece, the seed was an anonymous twelve-tone row. In *Praeludium* (Inflorescence II), for piano, it was the harmonic structures of a piano miniature I wrote in 1994. In the present miniature for flute and piano, I weave pitch class collections from the opening of Varèse’s Density 21.5 into the harmonic fabric while the dilated temporal structure of the Varèse guides the harmonic rhythm. The other shared characteristic of the compositions in the Inflorescence series is that their identities emerge through the compositional process itself, which is to say, I do not have a clear idea where the pieces are going or what they are “about” before embarking on them. *Danse d’été* (Inflorescence III) is dedicated in admiration and friendship to Elizabeth McNutt and Shannon Wettstein on the occasion of the Calliope Duo’s tenth anniversary.

Running Ahead (2010)
Composer: Momilani Ramstrum, (PhD ’04)
Performer: Momilani Ramstrum (vocalist, programmer, instrument designer)

The recording and looping of vocal sounds are triggered by a wireless MIDI glove with embedded magnetic sensors. DSP is done in Pure Data with 12 channels of audio. In this piece the vocalist begins unencumbered, advances, then struggles to keep up with the looping sounds. The ensuing race ends with a clear winner.

Meu rosto mudou for piano and film (2010)
Composer: John Celona, (MA ’78)
Performer: Luciane Cardassi, (DMA ’04), piano, actor

John Celona’s Meu rosto mudou is for piano and video projection, featuring Luciane Cardassi as pianist, actress and delivering Portuguese text. It is part of a trilogy which includes “Reaching for Paradise” (2001), a four-minute film short of a multimedia performance and “The Strange Case of DJ Cosmic” (2009), a 30-minute film (available on IMDb) with a beat-poetry screenplay by John Celona, paraphrased in five languages and filmed in the USA, Canada and Mexico. Meu rosto mudou (My face has changed) includes the composer’s seven-movement piano work Point No Point (2007), written for pianist Luciane Cardassi. John Celona and Luciane Cardassi have enjoyed a fruitful collaboration for the past five years that began at the Banff Centre for the Arts, where they met in 2005. The basis and inspiration for the trilogy comes from Carolyn Cassady’s Off the Road: 20 Years With Kerouac, Cassady and Ginsberg and Pierre Boulez’ book Orientations. “Meu rosto mudou” was premiered in Montreal, August 2010.

YesNo (2010) for solo theatrical performer, live motion tracking system, interactive sonic environment, and computer controlled spotlight.
Composed and Performed by David Bithell, (BA ’99)

I continue to be interested in the many ways that gestures (physical, facial, sonic, social) inform our awareness of the world around us. Without relying on verbal language, a shrug, a sigh, a grimace or nod can speak volumes. We all know this. “YesNo” takes this as its starting point - a set of gestures that link sight and sound in their own private little conspiracy. My main job as a composer/performer is tampering with the evidence.

Oli’s Dream for piano and computer projection (2008)
Composer: Jaroslaw Kapuscinski, (PhD ’97)
Poetry: Camille Norton
Performer: Jaroslaw Kapuscinski, piano

Oli’s Dream is a playful collaboration between music and writing, between a piano keyboard and a typewriter keyboard, and, above all, between a composer and a poet. When composer Jaroslaw Kapuscinski and poet Camille Norton began talking about the rapport between music and poetry, they discovered that they shared the same dream, the dream in which a piano becomes a typewriter and in which a typewriter becomes a piano. Oli’s Dream is therefore an experiment in synaesthesia, an attempt to fuse the temporal modes of music with the spatial and temporal domains of words. In the process, the audience finds itself in the presence of a perceptive, purely aware being, Oli, who creates himself through his encounter with words. Words here make and unmake themselves from the outside in or the inside out, transforming themselves as they discover their own direction in time. As Oli’s Dream unfolds in the interstices between listening to sound and reading letters on a screen, it moves into the additional spatial, visual, and temporal dimensions of live performance, enacted here.
by the composer at his piano engaging in a call and response with letters and words appearing and then pulling themselves apart on a screen.

**The Five Lives of Helios** for solo bass drum, ceramic tile, and percussionist (2010)
Composer: Ross Karre (MA ‘07, PhD ‘09) (b. 1983)
Performer: Ross Karre

*The Five Lives of Helios* is a piece inspired by the life and work of the late 19th century photographer Edward Muybridge (who used many pseudonyms, including Helios). The piece functions as a wordless oration of Muybridge’s work as a pivotal figure in the photograph’s ability to stop time (with increasing shutter speed) and liberate time (via the horse motion sequences presented by the zoopraxiscope, magic lantern, and, eventually, cinema). In this piece, the bass drum serves as a development bath where a sonic, instead of chemical, fixing process distills Muybridge’s story.

**La Trompette concrète** for trumpet and live electronics (2010)
Composer: Tom Dambly (MA ‘89)
Performer: Tom Dambly, trumpet

The sound of the trumpet is quite a complex phenomenon, having rich overtones, idiosyncratic attack characteristics, spectral envelopes that vary widely depending on both amplitude and frequency, and a whole host of other context-dependent attributes, all of which make trumpet tones very difficult to simulate. (Whether this has led to any level of job security for trumpet players is a topic for conjecture.)

At its most elemental, the trumpet is an amplifier of the performer’s voice. The relationship of the trumpet to the human voice is more than metaphorical. There are many similarities between vocal and brass technique; both address the concepts of resonance and placement in the body, and concern themselves with the influence of formants on the quality of sound.

A performer’s sound on the trumpet is therefore a very personal thing. The inherent complexity of its apparatus and the physicality of its production make it almost inevitable that each player will have his or her own sound—perhaps improving the chances that the “grain of the voice” will be manifest in the music constructed from that sound.

All source material for *La Trompette concrète* consists of trumpet sounds recorded in the process of its composition. The transformation of that material followed an organic process of discovery, with the only compositional guideline being that some kernel of the original be allowed to emerge from time to time, be it gestural, timbral, or spatial.

O’Keefe/Stanyek/Walton/Whitehead + Rigler
Pat O’Keefe, (DMA ’01)

Flautist Jane Rigler (MA ’91, PhD ’96) joins Pat O’Keefe (clarinets), Jason Stanyek (MA, PhD) (guitars), Scott Walton (MA ’94, DMA ’03) (bass & piano), and Glen Whitehead (DMA) (trumpets) in a reunion of this improvising ensemble whose music is predicated on textural dexterity and timbral development. Described by George Lewis as, “a new kind of collective music-making,” and by Wadada Leo Smith as, “lyrical/expressic designed sonic fields,” Greg Burke evokes the spirit of this music when writing in the LA Weekly, “there is clarinet, guitar, piano and trumpet, but you almost wouldn’t know it. You’re in a factory at midnight as the janitor drags an oil drum across a cement floor. And it sounds beautiful.”

Der Leichenschleicher (“The Corpse-skulker”): character study after Elias Canetti, for solo contrabass (1997)
Composer: Joseph Klein, (MA ‘96)
Performer: Adam Goodwin, contrabass

Der Leichenschleicher is one of a series of short works for solo instrument based upon characters from Der Ohrenzeuge: Fünfzig Charaktere (“Earwitness: Fifty Characters”), written in 1974 by the Bulgarian-born British-Austrian novelist Elias Canetti (1905-1994). Canetti’s distinctive studies incorporate poetic imagery, singular insights, and unabashed wordplay
to create fifty ironic paradigms of human behavior. This collection of works, begun in 1997, was inspired by the vividly surreal depictions of Canetti’s characters and include works for contrabass, violin, bass flute, ocarina, contrabassoon, glass harmonica, alto saxophone, bass saxophone, trumpet, percussion, and guitar. Der Leichenschleicher was composed in June of 1997 for contrabassist Michael Hartt. The work was first performed by Todd Markey on 22 November 1999 at the University of North Texas.

Tambo and Bones Revisited
Composer: Eric Simonson, (PhD ’99)

Tambo and Bones Revisited is a work which visits with the American minstrel show in such a way that sounds from the minstrel show (tambourine, “bones,” banjo, concertina, and fragments of an old recording) are heard to engage in a somewhat free fantasy. Along the way different degrees of synthetic-ness are explored and exploited.

Jacob’s Ladder (2005)
Composer: Stephen Blumberg, (’84, MA ’87, PhD ’94)
Performers: E. Michael Richards, (MA ’84), bass clarinet and Kazuko Tanosaki, (PhD ’84), piano

Jacob’s Ladder is a single-movement work for bass clarinet and piano composed for the Tanosaki-Richards Duo. The piece draws its inspiration from the biblical story from Genesis wherein Jacob, asleep in the desert with a stone for a pillow, dreams of a ladder to heaven with angels going up and down it:

He dreamt that he saw a ladder, which rested on the ground
with its top reaching to heaven, and angels of God were going up
and down upon it.
(Genesis 28, 12)

I also came across a couple of allusions to Jacob’s ladder in the poetry of Dylan Thomas:

Rung bone and blade, the verticals of Adam,
And, manned by midnight, Jacob to the stars.
(‘Altarwise by Owl-Light’ II)

Star-set at Jacob’s angle
(‘I, in My Intricate Image’ III)

The music attempts to capture the dark and at times ominous mood of the story of Jacob in its overall tone, while also suggesting the luminous vision of an infinite ladder with boldly rising and falling gestures and extreme registers. The metaphor goes deeper in that the musical material is derived from a simple yet powerful unifying concept: all of the pitches are drawn from segments, at various transposition levels, of an expanding interval chain that either ascends or descends from its starting point. A series of intervals laid end to end in a gradually yet infinitely expanding sequence seems to suggest, and is aptly symbolized by, the image of Jacob’s ladder. The composition of Jacob’s Ladder was supported by a Subito Grant from the San Francisco Bay Area Chapter of the American Composers Forum. The piece was premiered at the Festival of New American Music at California State University, Sacramento, and also performed at UMBC (University of Maryland, Baltimore County) in November 2005. --Stephen Blumberg
Street Cries (1983)  
Composer: Drake Mabry, PhD  
Performer: E. Michael Richards, (MA ’84), solo clarinet

Written for E. Michael Richards, Street Cries is in three movements. The first superimposes changes of articulation over timbre contrasts within motor-rhythmic phrases comprised of both 24-note and 12-note-per-octave pitch materials. The second explores the quiet territory of diads and air sounds, while the finale, built from a “composite” fingering, emphasizes the color contrasts of four different registers of the clarinet, while occasionally referring to material from the opening movements. A performance of this work led to the following observation from the Los Angeles Times: “Street Cries proved to be a tour de force that elicited knowing smiles – it satirized all those vapid, flashy clarinet showpieces – as well as admiration for the soloist’s (Richards) virtuosity.”

Manoalchadia  
Composer: Chaya Czernowin (Ph.D. ‘93)  
Performers: Lisa Cella, flute (DMA ’01); Leslie Ann Leytham, mezzo-soprano (DMA ‘13); Stephanie Aston, soprano (DMA ‘11)

In Manoalchadia, two love poems are introduced and sung simultaneously. One is passionate, extroverted and raw, while the other is lyrical, introverted and more refined. The bass flute motivates the energy which supports the dramatic conflict between the two voices. Gradually in the course of the piece, all three disparate forces integrate into one “musical body”.

Text: Two Hebrew poems by Endad Eldan
Her voice is saturated in observance of her surrounding  
transparent, as a window glass slowly covered  
colors, the blood her muscles  
shiver moves her voice as glass explodes  
as she bypasses a furious object, as a thunder bypasses her face  
her voice is like a throat of a swan in glass works  
but to touch truly, as said before, to feel the touch of her muscles  
to walk barefoot, to jump beneath shreds of glass,  
rising up and staring at you wondering about a transparency which is  
peaceful but is pressed, and its teeth face inward.

Touched/infected  
I am flowing into  
the touch of your hand  
in your blindness you touch  
the place where the pain is already smiling  
a longing which returns and asks for another touch

Scotch Minstrelsy (1982) for soprano and piano by Judith Weir (b. 1954)  
Composer: Judith Weir (b. 1954)  
Performers: Virginia Sublett, (MA ‘94, PhD ‘97), soprano, and Shannon Wettstein, (DMA ‘00), piano

1. Bessie Bell and Mary Gray  
2. Bonnie James Campbell  
3. Lady Isobel and the Elf Knight  
4. The Gipsy Laddie
5. The Braes of Yarrow

British composer Judith Weir was born in Cambridge in 1954. She studied with John Tavener, Robin Holloway, and Gunther Schuller. Her compositional style has been significantly influenced by folk music, as the song cycle Scotch Minstrelsy demonstrates. Her operas include Heaven Ablaze in his Breast (1991) and A Night at the Chinese Opera (1987). The composer writes, Scotch Minstrelsy is a song cycle comprising settings of five (greatly abbreviated) Scottish ballads whose subject matter is almost exclusively violent happenings which take place against the beautiful background of the Scottish countryside. It was my intention to reflect this underlying irony in the way the words are set to music.” The story of Bessie Bell and Mary Gray was taken from F.J. Child, English and Scottish Popular Ballads. Child explains, “While Miss Bell was on a visit to Miss Gray in Lednock, the plague broke out in the nearby town of Perth in 1645; in order to avoid which they built themselves a bower near the banks of the River Almond. Here they lived for some time; but the plague raging with great fury, they eventually caught it, and died.” The rhythmic ostinato in the piano part of Lady Isobel and the Elf Knight is highly reminiscent of that in Schubert’s Erlkonig, as is the plot: a young person enticed away by the king of the elves. However, the outcome in this case is quite different.

**Community and Creative Music: A Panel Discussion with Members of the Trummerflora Collective**
Panelists: Damon Holzborn, (BA ‘93); Jason Robinson, (MA ‘00, PhD ‘05); Scott Walton, (MA ‘94, DMA ‘03); Nathan Hubbard, Hans Fjellestad (BA ‘93), and Ellen Weller (PhD ‘02)

Featuring five UCSD alumni/Trummerflora Collective members, this panel discussion will center on the roles that community-oriented musician collectives have played in supporting a vibrant, nurturing discourse for commercially marginalized art forms. Since its founding in Spring 2000, the Trummerflora Collective has produced numerous festivals, concert series, and educational events in San Diego. Modeled in part on American musician collectives that emerged in the 1960s and 70s, Trummerflora’s mission has centered on supporting improvised and experimental music (often referred to as “creative music”) on the local level, music traditionally marginalized by commercial ideologies prevalent in local music scenes. This mission includes the collective as 1) a social support for individual artists, 2) a vehicle for individuals to fulfill their responsibility to the local community through performance, outreach, and education and 3) a way of creating connections with other communities of improvisers elsewhere in the United States and abroad. With strong connections to the UCSD Department of Music, Trummerflora’s ten year history provides opportunities to reflect on the relationship between the academy and the community and the social commitments of artists and educators.

The panel discussion will consist of short presentations by each of the panelists (15 minutes in total), followed by 15 minutes of discussion with audience participation. The panelist presentations will outline various aspects of Trummerflora’s history (and the role of musician collectives in American music) and pose challenging questions about community engagement and academic discourse.

**Spectral Analysis as a Resource for Contemporary Orchestration Technique**
by Francois Rose, (PhD ‘97)

I will introduce a computerized aid to orchestration that I developed in collaboration with James Hetrick, a colleague physi-
cist. The tool uses an advanced method of spectral decomposition. It can either be used as an analytical or composition tool.

Analysis: Our tool is used to analyze sound mixtures and to explain the context in which they work best. For instance, the mixture violin/clarinet in the low register, a fabulous complimentary combination, is disastrous when seeking a beating pattern.

Composition: The tool analyzes a sound and based on a specific group of instruments, provides suggestions on how to orchestrate that sound, thus we can explore the potential of new sound mixtures. For example, after analyzing a multiphonic for clarinet, the tool supplies three different ways to orchestrate that sound for piano, violin and clarinet.

Relationship to UCSD: This is a continuation of the research I started with Mr. Moore during the PhD studies.

Documentation: This presentation was shown at the Conference of Interdisciplinary Musicology in Montreal in March 2005. An article about it has been published in the Conference’s proceedings and in the Computer Music Journal (Vol 33. no.1)

Time and Timbre Dichotomies in Gagaku music
Francois Rose (PhD ’97) and Jaroslaw Kapuscinski (PhD ’97)

Traditional Japanese orchestral music is characterized by an emphasis on timbre and extreme slowness of time. This lecture will discuss how the two are correlated. The Japanese traditional concept of time emphasizes the present while the past and the future are replaced by eternity. An investigation of the Japanese concepts of Ma and Naru and of the Jo-Ha-Kyu principle demonstrates that the Japanese’s present is dichotomous, since it is at the same time, static and dynamic. The same duality is found in the timbral organization of traditional Japanese orchestral music, as revealed by an analysis of Etenraku, an emblematic Gagaku piece. The analysis focuses on rhythm, harmony and orchestration techniques and it shows each component to be made of some attributes that reinforce the static aspect of time, while others support its dynamic quality.

Transparency (Part I)
Composer: Josh Levine, (MA ’94, PhD ’02)
Performer: Aiyun Huang, (MA ’98, DMA ’04)

This is the first part of what was to be a four-piece cycle scored for four triangles, bass drum, maracas (absent in Part I) and sandpaper. The title refers to a line in Octavio Paz’s poem, Ustica: Mortalidad es transparencia (“Mortality is transparency”). The focal point of the cycle is the bass drum. It serves as a site for musical action that often seems to want to transcend the instrument’s typical character and limitations. Increasingly the player strives to delineate multiple timbres and musical layers, as if trying to teach the instrument to transform its body, to speak or even sing. The triangles, though at the other end of the piece’s timbral spectrum, share the bass drum’s persistent sustain and comparatively limited expressive possibilities. They, too, are eventually called on to engage in a more nuanced and “expressive” discourse than their ostensible nature might imply. They can be understood not just as the separate, strongly contrasting voice they appear to be, but also as another facet in the journey of a complex and evolving musical personality. Transparency (Part I) was written for the remarkable Aiyun Huang, who gave its first performance in September 2004 in Geneva, Switzerland. The music is lovingly dedicated to my mother, Gloria Levine. As I composed the piece, her mortality was becoming ever clearer; her passing, shortly after the premiere of Part I, in a sense completed the cycle before I had the chance to finish the other movements.
Etude No. 6  
Performer: David Ryther, (MA ‘97, DMA ‘09) (violin)

Now Is The Time (2009)  
Composer: Michael Pelz-Sherman, (MA ‘92, PhD ‘98)  
Performers: Michael Pelz-Sherman, piano; Mark Culbertson, bass; Jonathan Mattson, drums/electronic percussion  
I wrote this jazz trio composition around the time of the inauguration of President Barack Obama. It features improvised solos for piano and bass and triggered samples from Martin Luther King’s “I Have a Dream” speech.

days and days (2010)  
Composer: Erik Ulman, (‘92, MA ‘94, PhD ‘00)  
Performer: Anthony Burr, (DMA ‘04), bass clarinet  

days and days bears a double dedication: “for” the extraordinary clarinetist Laura Carmichael, who requested it; “after and to” the poet Heather Gordon, whose text gave my work its title and much of its inspiration. The piece emerged only through a long gestation. Although I began it in 2007, much of it was written during a Djerassi residency in the summer of 2008; it began to take its final form while I was the guest of Séverine Ballon at Akademie Schloß Solitude in May 2009; and it was only completed in January 2010. I am grateful to these friends and institutions for making this piece possible; and to Anthony Burr, with whom I am very happy to have, once again, an opportunity to work.

Dogwood (2000)  
Composer: Susan Moore, (‘80, MA ‘84)  
Performer: Jonathan Costa, piano  

Dogwood is one of a series of pieces inspired by trees. Moore has used nontraditional chords and weighted scales to represent growth patterns, wood grains, and textures of various trees in the series. In the area where she now lives, near Yosemite Valley, blooming dogwoods present splashes of color to an observer driving past in an almost kaleidoscopic effect. She has tried to capture that effect in sound in this piece. Jonathan Costa, who will be performing the piece today, is a music major at California State University, Fullerton where he has studied piano with Eduardo Delgado for two years. Jonathan is currently studying with Alison Edwards, and will be graduating in Spring 2011 with a BA in Liberal Arts in music concentration. Jonathan works as a pianist, organist, and instructor in Whittier, where he resides.

Reunion  
Composer: Harvey Sollberger (Professor Emeritus)  
Performers: Pat O’Keefe (clarinet), Shannon Wettstein, (DMA ‘00) (piano), Patti Cudd, (DMA ‘98) (percussion)  

Reunion was commissioned by the Twin Cities ensemble Zeitgeist. The title has nothing in particular to do with the content of the piece, but, rather, celebrates my musical reunion with its three performers, all of whom I’ve worked with in the past and enormously admire. My connection with them, of course, occurred here at UCSD and earlier, in the case of Pat O’Keefe, at Indiana University. In any case, many notes have flowed under the bridge in the intervening years, and it’s my hope that Reunion reactivates the thread of our connection in memorable and distinctive ways. Its foundation and cornerstone remains their artistry, projected from the past into the present.

Intersecciones II  
Composer: Cesar Potes, (PhD ‘98)  
Performer: Eric Derr
Intersecciones II (2010) is a work for solo percussionist playing glockenspiel, xylophone, bongos, 2 snare drums, large tam-tam, and electronics. The title makes reference to a modular approach to composition in which fixed sections are intertwined with movable ones, allowing the performer to define the final order of events in the piece. The “choose your own adventure” type of situation offered by this approach creates an intersecting game that I have been fortunate to explore in the last two years with Eric Derr, the fine performer of the piece today and whose creative playing has inspired aspects of this compositional exploration.

The Red Shoes (1996)
Composer: Pamela Madsen, (‘84, MA ‘89, PhD ‘00)
Performer: Patti Cudd, (DMA ‘98) (percussion)

The Red Shoes, commissioned by percussionist Patti Cudd, is from The Sexton Cycle, an hour-long cycle of works for soloists, ensembles and electronics based on the poetry of Pulitzer Prize winning confessional poet Anne Sexton (1928-1974). The facts of Anne Sexton’s troubled and chaotic life are well known: no other American poet has cried aloud publicly about so many private details. She was a mad housewife in the fifties who, after giving birth to her child, was dissatisfied with her life and started taking courses in writing poetry. She wrote about the social confusions of growing up in the female body and of living as a woman in postwar American Society. This fascination for revealing the physical body through her poetry, made her work extremely attractive in setting for my compositional work. My music shares some of the same concerns as her poetry, including the fascination for challenging the physical body, the body of the performer in performance and sound of environment can be portrayed through music. Sexton’s textural trademarks are also similar to techniques that I use in composing this work: The use of simile (like): Repetitious structure--associative forays that do not develop into thoughts but terminate in surreal images which stretch or suspend time. The use of a consistent pool of text-based metaphors that are echoed in musical emblems from which the works are drawn. Sexton’s signature of “clang”--the knock and jangle of textural assonance translated into sonic assonance of percussion and text.

As a solo for spoken text and percussion, the work conveys the inner duality and conflict of the self with the society as expressed in the poem through the cultural construct as well as through the struggle of the individual performer over the score or the composer. In the course of the work many different struggles of self vs. environment take place which are articulated by how the percussionist speaks in relationship to the multiple layers of percussion on which she is performing. The percussion set-up was constructed out of simple “found” percussion that were repurposed for use in the work. The choice of percussion replicates the sounds of the suburban society and Sexton’s life this spoken text reflects: an ashtray, wine bottle, cracked wood block, hand made recycled wood drum, etc. Each instrument matches the timbre, relative pitch and sound of the speaker’s voice. In addition, untraditional “found” natural objects are used as beaters on the bass drum head to imitate the sound and texture of outside environment, rustling leaves, ants walking, as iterated in the spoken text.

Virtue for flute and piano
Composer: Mark Osborn

Virtue has a partner work called Vice, for cello and tape. Together these pieces form the foundation of a work for 9 instruments and tape called the Fluid Pronoun. Each of these pieces blends and intertwines the electronic parts with the live parts in a way that often blurs the distinctions between the two. By doing so, I hoped to make a situation in which holding too tightly to the distinctions demarcating performers and materials becomes untenable. I hoped that by doing this, our interpretive faculties might become more supple and flexible. Virtue was written in collaboration with and for Lisa Cella and Shannon Wettstein.

Muna for amplified guitar and computer generated sounds (2006/08)
Composer: Juan Campoverde (PhD ’01)

There are two basic harmonic fields informing the sonic landscapes of Muna, each defined by a specific tuning system. Within each one of these fields, there are interrelated areas of sonic concentration forming a network of harmonic/timbral configurations around what could perhaps be described as resonant spaces. Traces, sedimentations, projections, and shades inhabit these spaces. Muna comes from the interaction between its sounds and the spaces around them. This version of the piece explores the first of the two harmonic fields. From the performance point of view, Muna explores regions not frequently visited by conventional guitar techniques. This approach relies on attentive listening, given the fragile quality of its sounds. This work was made possible in part with the support of the School of Music of DePaul University, and its “Summer Stipend to Support Creative and/or Scholarly Work” program. Muna, the combined word of moon and luna, was named by Mateo and Emilia, to whom this work is dedicated.

Montana and I see a light a comin, for guitar and piano
Composer: Alan Lechusza

Montana: This work comes began as an etude that I composed which then expanded into its own work. It’s a nice little piece that is able to satisfy the improviser and supporting ensemble at the same time.

I see a light a Comin’ (for Miguel Alvarez) - for guitar and piano: This work was composed while my brother-in-law Miguel Alvarez was in the hospital. He eventually “crossed over” (i.e., passed away) in November 2010 of severe health complications which left a strong mark on our family. His heart and soul continue to fill us each day. It is us, the ones left behind, that must endure and be strong for the next generations. This work is not filled with sadness but rather celebrates the complexities of life that are juxtaposed against our daily challenges.

*Korbinations*
Performer: Kristin Korb, (MA '94), bass

*Cosmologic*, with special guest pianist Anthony Davis
Jason Robinson, (MA ‘00, PhD ’05) (saxophone)
Michael Dessen, (PhD ’03) (trombone)
Scott Walton, (MA ’94, DMA ’03) (bass)
Nathan Hubbard (percussion)

The band will play a 30 minute set of compositions by Dessen, Hubbard and Robinson, with titles announced from the stage. A critically acclaimed group founded in 1999 while three of its member were graduate students in the Department of Music at UCSD, Cosmologic traverses the broad terrain of creative jazz and improvised music, integrating high-energy playing, intense introspection, rich grooves, open textures, and collective alchemy. Central to the group’s sound is a commitment to developing challenging and original compositions. While profoundly dedicated to improvisation, Cosmologic performs complex pieces that are composed by an individual member and then transformed through extensive group work. This process often leads the quartet into complex musical landscapes, while drawing on the individual strengths of each member. With nearly a decade of experience together, Cosmologic continues to extend their repertoire of original music, in an ongoing search for new ideas. The group has performed throughout the United States, Canada, Mexico and Europe and has released four critically acclaimed albums.

*Listening to the darkness*
Kuej Lin, (MA ‘03, PhD ‘08)
CPMC Room 145
Friday 10:00 AM - 8:00 PM
Saturday 10:00 AM - 8:00 PM

Inspired by the sounds and echo-location of bats, the installation explores the relationships between sound, environment and behavior by inviting participants to sense the space through listening in complete darkness. The installation utilizes sound samples of various types of bat-calls and low frequency of environmental noises which are live-sampled from out-
side of the installation space. Three infrared sensors are positioned in the room and capture the movements and locations of the participants in the complete darkness which interactively shape the playback of the soundscape. The greater activities of the movements eliminate the sounds while dense layers of bat-calls are revealed when the participants stand still. The installation is a collaboration between UCSD music alumni Kueiju Lin and Chris Tonkin. It was sponsored by the Taipei Artist Village and exhibited at the 2009 Totally Huge New Music Festival, Perth, Australia.

**Eartudes**
Cristyn Magnus (PhD)
CPMC Room 365
Friday 10:00 AM - 8:00 PM
Saturday 10:00 AM - 8:00 PM

**Eartudes** are a series of etudes for ears. Sounds are produced by the hands on the body. Ambient sounds in the room are filtered by positioning hands on the ears in various ways: covering, cupping, bending, pressing, hovering. Sounds are made by the hands contacting the body: brushing, rubbing, bending, tapping. Sounds are transmitted to the ear through flesh and bone rather than air. Each performance is personal: for a performer/audience of one. **Eartude 1** is for solo ear; **Eartude 2** is for stereo ears; **Eartude 3** is for the whole head. Audience/performers are encouraged to view the animated score several times: learning, rehearsing, then performing.

**Flow (2010)**
Composer: Stephen Blumberg, ('84, MA '87, PhD '94)
New Media Artist: Rachel Clarke
CPMC Room 367
Friday 6:00 PM - 8:00 PM
Saturday 10:00 AM - 8:00 PM

**Flow (2010)** is a dual channel installation by Rachel Clarke choreographed to music by Stephen Blumberg. **Flow** explores our relationship with oil—the possibilities it creates and the catastrophes it can unleash. It unfolds as a series of sequences that reflect on the complex interconnections between people, economies, resources and the environment.

Signs (2006)
Composer: Allison Johnson, (PhD ’03)

Using an undercurrent of surveillance along with the integration/bifurcation of sign and gesture, Signs explores tropes of translation and what mathematician/philosopher Brian Rotman calls a “post-documentist mode of re-presenting human movement.” By coding sound and decoding gesture, the performers react sonically to the motion or stasis of the sign twirlers, as a kind of ersatz video conductor. The interpolation of signifier, sound, and gesture evokes language theories (e.g. the simcom of American Sign Language) and the recursive relationships of productions of meaning.

Cold Spring
Composer: Sean Griffin, (PhD)

Tying together orthodoxies from performance artists and opera singers in Los Angeles, to actors from Chicago, to local theater productions and music ensembles, Sean Griffin’s Cold Spring presents a multi-faceted musical theater experience. Beginning with a historical reinterpretation of tests and research from the 1920’s American Eugenics Archive, the performance moves through dismantled traditional American plays and dances featured in the Hudson Valley; explores theatrical interpretations of Robert Schumann’s Liederkreis, Op.39; and restages hypnosis recordings from the 1964 Betty and Barney Hill abduction case. With a special appearance by the RPI Cheer Squad, Cold Spring culminates in a choral rhapsody that weaves these often conflicting performance styles into a complex, sometimes humorous, sometimes frightening operatic spectacle. Premiered at EMPAC (The Curtis R. Priem Experimental Media and Performing Arts Center at Rensselaer Polytechnic Institute), December 2010.

Unspoken Voices-Unbroken Spirits - Audio Visual Version (2009)
Composer: Koji Nakano, (PhD ’06)

Unspoken Voices-Unbroken Spirits for Thai Classical Singers with Piphat Ensemble was composed for the faculty and students at the Burapha University in Thailand during my creative arts residency at the music department which was funded by Asian Cultural Council. In this piece I expressed a musical and spiritual common ground between Japanese and Thai traditional music in an attempt to achieve a confluence of Asian musical cultures. While I was composing it, I was particularly attracted to Thai Piphat music because of its similar musical characteristics to Japanese Gagaku music (i.e. the strong presence of reed instruments and the use of two-faced drums, creating a heterophonic texture). The film for Unspoken Voices–Unbroken Spirits was created later by San Francisco based filmmaker Tiffany Doesken, whom I met during my residency at Yaddo in 2007.

Unspoken Voices-Unbroken Spirits for Audio Video work with Thai Classical Singers and Piphat Ensemble was premiered as part of the concert Confluence of Cultures: Music of the Pacific Rim at the California State University at San Bernardino, where I was Composer in Residence for the music department on May 2009. Unspoken Voices–Unbroken Spirits was funded by the Asian Cultural Council and the version for Audio Video was funded by the S&R Foundation. I would like to dedicate this piece to the memory and spirits of my mother and grandfather.

White Shoe Station
Composer: Avi Tchamni, (PhD ’03)

Inspired by the story of the mysterious man who in 2005 became known as the ‘piano man’, White Shoe Station combines image, music, text and voice, to create an oblique yet poignant narrative. Together, these elements set the film in an unnamed place and time, where it traces the breakdown of a man who no longer wants to recall or be called.

**Mark Applebaum** was asked to help out with this festival. He did his best, but by the time you read this everything is probably going wrong and, consequently, everyone hates him. This kind of self-loathing is actually just a cover for an overly-developed ego, a kind of narcissism that most people find off-putting. Despite, or perhaps because of these character flaws, he was tenured at Stanford University (a.k.a. “UCSD North”) where, through a series of well-timed bribes, he received the 2003 Walter J. Gores Award for excellence in teaching. Some of his music is composed according to pain-taking and thorough, if dreary, techniques defended by sober, sensible, and defensible logic resulting in characteristics like authenticity, integrity, depth, merit, and seriousness, qualities that tend to make modernists happy, or at least comfortable. Recent works, however, tend increasingly toward absurdity: of late he is especially interested in music that doesn’t involve sound. PhD=UCSD; Brian Ferneyhough; important commissions from prominent ensembles; prestigious festivals in rigorous places like central Europe; outreach projects in exotic locations (e.g. Ouagadougou, Burkina Faso); impressive recordings; awards; blah; blah. Prior to his current appointment he taught at Mississippi State University and at Carleton College. He performs with his father in the Applebaum Jazz Piano Duo and still builds sound-sculptures. He is married to Joan Friedman (who endured a lifetime of tedious new music concerts at UCSD). They have a lovely 5-year-old daughter, Charlotte; she can be any kind of composer she wants to be. **Ignacio Baca-Lobera** was born in Mexico City in June 28,1957. He started his musical interests as a self-taught musician. Later, he studied composition with Julio Estrada in Mexico, and recently with Joji Yuasa, Jean-Charles François and Brian Ferneyhough in the United States. He holds Ph. D. and Master degrees in composition from the University of California at San Diego. He also has taken summer courses at IRCAM (1992) and Darmstadt (1990 and 1992). His chamber and orchestral music explore techniques such as random processes, microtonalism, Network Theory and graphic approaches to composition. His music has received several awards: honorable mentions at Jose Pablo Moncayo contest for orchestra (1982) and Lan Adomian contest for chamber music (1980), both in Mexico; finalist at New Music Today (1988) in Japan; and Kranichsteiner Musikpreis at Darmstadt, Germany in 1992 for Trios (y dobles). For the year 1992-93 Ignacio Baca-Lobera was awarded an artist's salary from the “Fondo Nacional para las Artes,” Mexico.; In 1996 he won the first place of the 17 th Irino Prize for orchestral music in Tokyo. Since April of 1997 he is a member of the “Sistema Nacional de Creadores” of Mexico. In June of 2001 he was appointed fellow of the Guggenheim Foundation for one year. He currently lives in Queretaro, Mexico where he is a full time professor at the Universidad Autonoma de Queretaro.

**Cooper Baker** is a sound artist living in San Diego, California. He regularly plays experimental music at venues along the west coast and his artwork has been exhibited in galleries and publications throughout the United States and abroad. In addition to his own creative output, he provides other artists and companies with custom software and electronics as a creative technical consultant. Originally from Los Angeles, he recently moved to San Diego to attend the University of California San Diego in pursuit of a computer music Ph.D. where he is studying with Miller Puckette, Tom Erbe, and F. Richard Moore. Prior to enrollment at UCSD he was a music faculty member at California Institute of the Arts where he also received his MFA in experimental composition and finished his BFA in music technology. While at CalArts he refined his artistic practice and began incorporating new and experimental electronic media in his artwork and music production, under the guidance of Morton Subotnick, Mark Traylor, and Barry Schrader.

**David Bithell** is an interdisciplinary composer and performer whose work blurs the lines between experimental music and theater. His works have been presented at the SPARK Festival of Electronic Music and Art, Ghent International Film Festival, Pixilerations [v.6], the Seoul International Computer Music Festival, the MANCA Festival, and in venues across the United States. David is a professor of music composition at the University of North Texas and is the founding coordinator for the Initiative for Advanced Research in Technology and the Arts (iARTA). In 2004 he earned a Ph.D in Music Composition from the University of California, Berkeley where he studied composition and computer music with Edmund Campion, David Wessel, and Cindy Cox. He received his B.A. in Music from UCSD in 1999 studying composition with Rand Steiger, Chinary Ung, Chaya Czernowin, Brian Ferneyhough, and Roger Reynolds. He studied trumpet with Edwin Harkins -- whose performance art duo [THE] has been very influential on his recent work.

Richard Carrick is a composer, pianist and conductor who writes music for soloists, chamber ensembles, orchestra, film, theatre, electronics and concert music with video. Described as “charming, with exoticism and sheer infectiousness” by Allan Kozinn of The New York Times, Carrick's music draws inspiration from his French, North African, and UK background, his studies in mathematics and philosophy, interest in psychology, and experience as performer of notated and improvised music. He has spent recent years developing his compositional approach in New York, where he co-founded Either/Or, a “new and first rate new music ensemble” (Bernard Holland, The New York Times) to champion music by the American Experimentalists, European Avant-garde, and emerging composers. Carrick’s compositions have been performed throughout North America and Europe, including The New York Philharmonic Ensemble Series, Vienna’s Konzerthaus, ISCM World Music Days, Royaumont Voix Nouvelles, Darmstadt Internationale Ferienkurse für Neue Musik, Tokyo’s International House, New York’s Merkin Hall, Miller Theater, and the MATA Festival. He has received premieres by the Nieuw Ensemble, The Nouvel Ensemble Modern, JACK Quartet, Wet Ink Ensemble, Either/Or, the Ensemble-On-Line of Vienna, Brown University, Magnus Andersson, Rohan de Saram, Carin Levine, David Shively, Alex Waterman, and Dov Scheindlin. As pianist and conductor, Carrick has performed a unique repertoire of contemporary solo and chamber pieces on the Green Umbrella Series (LA) and throughout the US and Europe. He learned the guitar to give the New York premiere of Helmut Lachenmann's Salut für Caudwell; performed on marimba with Kyandu Muziki in Dar es Salaam, Tanzania; and received the Gold Medal of Excellence at the Park City Film Festival 2007 for his film score Solidarity. Carrick is currently Adjunct Faculty at New York University (Faculty of Arts and Sciences), a Visiting Artist in Residence at the New School for Social Research, and trains composers for the New York Philharmonic's Very Young Composers Program in New York City and abroad. He has recently lectured on his own music at the Royal College of Music in Stockholm and given the composition masterclass at Ehwa Woman's University of Seoul, South Korea. He studied Mathematics and Music with David Rakowski and Mario Davidovsky at Columbia University (BA), with Brian Ferneyhough, Alec Karis (piano) and George Lewis at UC-San Diego (MA, PhD), at the Koninklijk Conservatorium in the Hague and at the Stage d’Ete of IRCAM. www.richardcarrick.com

Juan Campoverde Q. was born in Ecuador, completed his musical studies at the University of California, San Diego, studying with Roger Reynolds. His music has been performed in the Americas, Europe, and Asia. He currently teaches at DePaul University in Chicago.

Luciane Cardassi. Brazilian-Canadian pianist Luciane Cardassi earned a doctorate in contemporary music performance from the University of California, San Diego in 2004. Since then she has been performing and developing collaborations with composers from around the world. Most of her collaborations are developed during residencies at The Banff Centre for the Arts, and have been followed by performances in Brazil, Canada and the UK. She has had financial assistance from the Canada Council, Alberta Foundation for the Arts, and The Banff Centre. Luciane embraces the challenges and opportunities given to her by composers. Most of the works she has premiered in recent years are for piano, prepared piano and electronics, and increasingly video and 3-D imaging. She learned to play the autoharp and the wind-whistle for recent collaborations with Canadian composers David Occhipinti and Emilie LeBel. She is often called upon to sing, to recite a text, or, as in Aaron Gervais’ “Hockey Story”, she speaks, plays the piano and a midi-keyboard. At times she has a role as actor, as in John Celona’s “Meu rosto mudou”, where Luciane is both the live pianist and the actor on the screen. These challenging, and often fun, experiences expand her repertoire of creative possibilities, establishing strong connections between composer and performer during the creation of new works. Luciane currently lives in Banff in the Canadian Rocky Mountains. She is an avid long-distance runner and has completed the Rock&Roll San Diego Marathon, as well as several other marathons in Canada.

Nancy Briggs, composer/pianist, was born in St. Paul Minnesota, grew up in Maryland and the Bay Area. She received a B.A. in music at UCB, an MFA in Electronic Music and Recording Media at Mills College’s Center for Contemporary Music (thesis: Improvisations, an intermedia theater work), and a PhD in Theoretical/experimental studies at UCSD. Her dissertation: Creative Improvisation: A Musical Dialogue, was based on self-recorded musical and verbal interviews (Creative Improvisation Archive, housed at the UCSD library) with leading improvisor/composers (Pauline Oliveros, James Newton, others). Two of her major works premiered in 1987: Calandria for 60-piece orchestra in New York, and Monstrum, a jazz opera in San Diego, in collaboration with artist Deloss McGraw and writer Barton Thurber (music for 26 actor/singers and 11 instrumentalists; and computer-generated music realized at UCSD’s CME, now CRCA, co-composed with Robert Wylie). She was Assistant Professor of Music at Bard College in New York in the late eighties. Nancy moved to Los Angeles where she worked as a professional musician, in film and television, and directed/taught at colleges. In 1999 she released Dreamdance, a critically-acclaimed CD of original songs in jazz trio format. She publishes through her ASCAP company, and receives modest royalties through international licensing. Since moving to the Sacramento area in 2000, Nancy continues to perform and record; with her own groups, in big bands and ensembles, and in recital. Her music has been featured in live internet broadcasts, festivals, television and radio. She teaches at Sierra College in Rocklin.

John Celona is an internationally award-winning composer and artist from San Francisco. His 30-minute film, “The Strange Case of DJ Cosmic,” http://www.imdb.com/title/tt1537960/ is the first in a series of three films and includes the neo-noir feature-length to Charles Bukowski entitled “Nightfreight.” In 2001, he directed and conducted Schoenberg’s “Pierrot Lunaire”, an expressionist ‘cabaret noir’ journey in English, German, and French. In the same year, he founded the avant-garde jazz sextet “John Celona’s BlueCity”, in which he directs, composes, and plays piano. His work is published by Lawrence Russell’s Culture Court.com. He is presently pursuing research in broadband content and creating new trans-media works with HD video, text, and surround sound. John holds a Ph.D. from University of California, San Diego. John is Professor of Music at the University of Victoria.

Chris Chafe is a composer, improvisor, cellist, and music researcher with an interest in computers and interactive performance. He has been a long-term denizen of the Center for Computer Research in Music and Acoustics where he is the center’s director and teaches computer music courses. Three year-long periods have been spent at IRCAM, Paris, and The Banff Centre making music and developing methods for computer sound synthesis. The SoundWIRE project launched in 2000 involves real-time Internet concertizing with collaborators the world over. New tools for playing music together and research into latency factors are current goals. An active performer either on the net or physically present, his music is heard in Europe, the Americas and Asia. The five countries “Resonations” concert was hosted by the United Nations in Nov., 2009. CD’s of works are available from Centaur Records. Gallery and museum music installations are continuing into their second decade with biological, medical and environmental “musifications” featured as the result of collaborations with artists, scientists and MD’s. New works include “Electrode” for Laptop Orchestra, TQ01 “tomato quintet” for the San Jose Biennial and “Siren Cloud” for CO2 sensors, duo guitar / piano and audience breath at the 2010 MiTo Festival.

Daniel Koppelman. Born in New York and raised in California, DANIEL KOPPELMAN has gained experience with many musical traditions—classical and popular, composed and improvised, acoustic and electronic—which has led him to explore their intersections in search of new possibilities for creating music. Koppelman’s current interests include digital signal processing of acoustic piano and improvisation with various real-time controllers in conjunction with software from Cycling ‘74 and Ableton. He has recorded for CRI, New World Records, Neuma, Capstone, SEAMUS, C74, and Everglade. His 2005 2-disc CD/DVD set of music for piano and electronics, “Escapement”, was hailed by Keyboard Magazine as “engaging, intelligent, and unpretentious.” Koppelman holds degrees from San Francisco State University (B.M.), Indiana University (M.M.), and UCSD (Ph.D.), where he was a Regents Fellow; his piano teachers have included Wayne Peterson, James Tocco, Cecil Lytle and Alec Karis. Currently Professor and Director of Music Technology at Furman University in Greenville, South Carolina, Koppelman has been a resident artist at STEIM in Amsterdam and the Institute of Sonology in The Hague. In 2008 he was awarded a Fulbright Scholarship to teach courses in Odessa, Ukraine in contemporary American music and new technological tools. In 2009 his Fulbright was extended to provide for lecturing and concertizing across Ukraine. Koppelman recently completed recording a new disc, in collaboration with his wife Ruth Neville (with whom he combines to form duo runedako), featuring the music of composer Benjamin Broening; the CD, “Recombinant Nocturnes”, is scheduled for a December, 2010 release by Innova Records.
Igor Korneitchouk. Born in Spain, of Russian and German descent, Igor Korneitchouk emigrated with his family to Cleveland, Ohio, when he was a small child. He received his Master’s in composition from the Cleveland Institute of Music, not far from where he grew up. After which, he packed up all his belongings in a U-Haul towed by a Toyota and headed west to attend University of California, San Diego where he earned his PhD. In 1989, he received a National Endowment for the Humanities fellowship to study Jazz at Yale University. He has been awarded grants from UC Regents and AMC for the performance of his Concerto for Trumpet and Orchestra, “Desert Flowers.” On the Master Musicians Collective label he produced two recordings, one in Prague 1997 for his Viola Concerto, the other in the UK in January of 2002 where he oversaw the recording with Gerard Schwarz conducting the Royal Liverpool Orchestra. 2008 saw the release of two more CDs: a full album of his chamber music on the Centaur label, and his early Symphony “Passage” on the ERM Media label. From an American Record Guide review of his first CD by Old King Cole Productions, The Virtual Performer: “Korneitchouk writes with facility in such a dizzying variety of styles - tonal, serial, minimalist, and much else - that one can almost certainly find something to enjoy.... His style is as virtual as his method.” Igor Korneitchouk is currently Professor of Music at San Diego Mesa College.

Charles Kronengold teaches musicology at Stanford. He has published on Western art music, popular music, film and aesthetics, and he’s the author of two forthcoming books: Live Genres in Late Modernity and Different Methods, Different Signs: Crediting Thinking in Soul Music. He received his Ph.D. in composition from UCSD, taught musicology and film theory at Wayne State University in Detroit, and was recently a Society for the Humanities Fellow at Cornell.

Bass-baritone Philip Larson studied at the University of Illinois and received a degree in vocal performance. While there, he worked with world-renowned coach-accompanists Paul Ulinowski and John Wustman. At that time, he also began collaborating with resident contemporary composers Kenneth Gaburo, Salvatore Martirano, Roger Reynolds, and Gunther Schuller. He performed “The Visitation” by Schuller with members of the original Hamburg Opera production. He went on to premiere several new operas in Boston, Cleveland, San Diego, and Munich. He was a founding member of the “Extended Vocal Techniques Ensemble,” one of the first groups dedicated to the performance of vocal music featuring extended techniques. The quartet performed throughout the United States, Europe and Canada, appearing at festivals in Chicago, Montreal, Vancouver, Amsterdam, Stockholm, Bourges and Toronto. They performed works by Joan La Barbara, Joji Yuasa, and recorded works by Roger Reynolds, among others. In 1977 Larson, with Edwin Harkins founded [THE], a composing/performing duo that performed at Music Today in Tokyo, Paris Autumn Festival, the Darmstadt Ferienkurse, the Inter-Society for the Electronic Arts in Rotterdam, the Suzuki Theater Festival in Japan, the New Music America Festival in Chicago and PICA in Perth, Australia. They have collaborated with John Cage, Toru Takemitsu, Anthony Braxton and media artist Vibeke Sorenson. Their award winning video, made with Vibeke Sorenson, has been shown at the SIGGRAPH conference in Los Angeles and festivals in Copenhagen, Rio de Janeiro, Seattle, Souillac France and Madrid. As a concert soloist Larson has performed in New York, Boston, Chicago, Los Angeles, Paris, Tokyo, Munich, Lisbon, Cleveland, Bukarest and Warsaw appearing with Ensemble Intercontemporain, Cleveland Chamber Symphony, Handel and Haydn Society, Metropolitan Chamber Orchestra. red fish blue fish percussion ensemble, and Speculum MUsicae under the direction of such conductors as David Atherton, James Levine, and David Robertson. In addition Mr. Larson has, for many years, sung early music, beginning his work with George Hunter at the University of Illinois, recording “Masses of Josquin” for Nonesuch Records. He performed in New York with Pomerium Musices singing on their Ockeghem Masses for Nonesuch. 2008 saw the release of two more CDs: a full album of his chamber music on the Centaur label, and his early Symphony “Passage” on the ERM Media label. Larson is Professor of Music at the University of California San Diego. His recordings include the works of Iannis Xenakis, Anthony Davis, Roger Reynolds, and Chaya Czernowin. Josh Levine trained as a classical guitarist at the Musik-Akademie der Stadt Basel in Switzerland, then studied composition there with Balz Trümpy. From 1994-95, he participated in IRCAM’s year-long computer music course. In 2002, he received his Ph.D. from UCSD, where his composition instructors were Brian Ferneyhough (thesis adviser), George Lewis (improvisation), Roger Reynolds, Harvey Sollberger, Rand Steiger, and Chinary Ung. He lectured in composition, electronic music, and music theory at San Francisco State University from 2000-08. He has also taught composition at UCSD and Stanford University. Currently he is Assistant Professor of Composition at the Oberlin College Conservatory of Music. Levine’s tape composition, Tel, garnered First Prize at the Bourges International Electroacoustic Music Competition in 1987 and a Euphonia d’Or in 1992. His music has been commissioned by new music ensembles and soloists such as Magnus Andersson, Aiyun Huang, Marcus Weiss, Jürg Wyttenbach, Contrechamps, and the Ensemble Intercontemporain under David Robertson. The Basler Sinfonietta, singers Jen Cobb and Donatienne Michel-Dansac, guitarists Geoffrey Morris and Seth Josel, percussionists Françoise Rivalland, Steven Schick, and Vanessa Tomlinson, flutists John Fonville, Elizabeth McNutt, and Philippe Racine, clarinetists Ernesto Molinari, Pat O’Keefe, and Carl Rosman, cellist Rohan de Saram, trombonist Benny Sluchin, members of musikFabrik, Klangforum Wien, Ensemble Phoenix, and conductors Johannes Kalitzke and Peter Rundel are among the many other leading musicians who have performed his works internationally. In Spring 2011, UCSD alumnus David Shively (the work’s dedicatee) will premiere Levine’s extended vibraphone solo, Les yeux ouverts, in New York City.
Kueiju Lin enjoys composing for acoustic and electroacoustic instruments, sound installations and interdisciplinary collaborations in both theater and dance. She is also an improviser on piano. Past commissions include: La Jolla Symphony and Chorus (USA), Nouvel Ensemble Moderne (Canada) and the Forum Music Ensemble (Taiwan), amongst others. Her music has been performed in Taiwan, Japan, Korea, Israel, Australia, France, Poland, Canada and across the USA. She is currently the music director of the M.O.V.E. Theater Group (Taipei).

Terry Longshore is active as a performer, composer, and educator of percussion and has performed nationally and internationally. He performs regularly as a soloist and with the ensembles Skin & Bones, Caballito Negro, Sonoluminescence, and Dúo Flamenco. He can be heard on numerous CD and motion picture recordings and has premiered many compositions for solo percussion, chamber ensemble, and symphony orchestra. His most recent recordings are of the works of Iannis Xenakis, Mark Applebaum, and William Kraft. Terry Longshore is a Yamaha Performing Artist and an artist endorser for Remo drumheads, Vic Firth sticks and mallets, and Zildjian cymbals. His own compositions are published by Go Fish Music. Longshore holds bachelor’s degrees from the California State University at Fresno and Sacramento. He earned the master’s and doctoral degrees in contemporary music performance from the University of California, San Diego where he studied under percussion virtuoso Steven Schick. Longshore studied tabla with Pandit Swapan Chaudhuri at the Ali Akbar College of Music and has undertaken additional studies in Indian classical music with sitar virtuoso Kartik Seshadri. He has taught at several universities and colleges and currently holds the position of Associate Professor of Music and Director of Percussion Studies at Southern Oregon University in Ashland, Oregon where he directs the SOU Percussion Ensemble and percussion quartet Compás.

Katalin Lukacs. Originally from Transylvania, Katalin Lukács is a prizewinning pianist based in San Diego, California. As a soloist she has appeared with orchestras both in Europe and in the United States. In addition to performing works of the classical repertoire, Katalin is an avid promoter of contemporary music. She has appeared as a soloist or chamber musician at new music festivals in the United States and Europe including the Darmstadt New Music Courses in Germany, the Ostrava New Music Days in the Czech Republic, the SEAMUS National Conference in Eugene, Oregon among others. She has performed with new music ensembles redfishbluefish, Ensemble Zs, SONOR, and Ostravska Banda. Recently she performed on the Los Angeles Philharmonic’s Green Umbrella Series and on UCSD’s Camera Lucida chamber music series. She is featured on recordings of many 20th century composers including releases on Mode and New World Records of Stockhausen, Scelsi, and Stuart Saunders Smith. She holds degrees in piano performance from the “Gh. Dima” Music Academy in Cluj, Romania, and The University of Alabama School of Music. Currently she is completing her studies for the Doctor of Musical Arts degree at UCSD and is active as a pianist, promoter of contemporary music, educator, and vocal accompanist.

Eric Lyon is a composer and computer music researcher. During the 1980s and 1990s, his fixed media computer music focused on spectral and algorithmic processing of audio, with a tendency toward extreme modifications of samples, variously sourced. From the early 1990s, Lyon became involved with live computer music, performing solo, and in the Japanese band Psychedelic Bumpo. Later in the 1990s, he gravitated toward software-based live processing, starting to develop Max/MSP externals in 1999. This work resulted in his LyonPotpourri collection of Max/MSP externals, and the FFTease spectral package, developed in collaboration with Christopher Penrose. In recent years, Lyon has focused on computer chamber music, which integrates live, iterative DSP strategies into the creation of traditionally notated instrumental scores. Other interests include spatial orchestration, and articulated noise composition. Lyon teaches in the School of Music and Sonic Arts at Queen?s University Belfast.

Drake Mabry lived in France from 1988 to 2010. Originally a classical oboist, he has also performed as a jazz musician with big bands and small ensembles, and as an improviser, performing on bamboo clarinets of his own design and manufacture as well as a double bell euphonium. His compositions have been widely performed in the United States, Europe and the Orient and he has received commissions and grants from performers, ensembles and the French government for his music. His principal composition teachers were Will Ogdon, Paul Cooper, Krysztof Penderecki, and John Cage. In recent years his paintings and poetry have been selected by composers, theatre groups, and improvising performers as sources for their compositions and improvisations. He has taught at universities in the United States and France and for seven years was director of the French government subsidized CEFEDEM School of Music in Poitiers, France. He is also a member of the French Ministry of Culture’s commission of experts. His poetry has been published in poetry magazines in the United States, England and on several internet poetry websites. His music, paintings and poetry can be seen at: www.drakemabrypublishing.com and elsewhere online.

Pamela Madsen is acclaimed internationally as a composer, performer and scholar. Through her compositions, interactive opera/installations, writings, collaborative projects, collected archives of works by women in electronic music, teaching, performances and organization of events she has created a body of work with a profound breadth of vision. With a Ph.D. in Composition from UCSD with Brian Ferneyhough, doctoral studies in Music Theory from Yale University, and post-doctoral studies in Music Technology at IRCAM, Paris, Madsen has been honored with awards, grants, residencies and

Victoria Martino is a magna cum laude graduate of Harvard University. While pursuing an M.A. degree in violin perfor-

ance at UCSD, she was first violinist in the resident graduate string quartet, and a member of SONOR, performing many 

world premieres of compositions including Bernard Rands’ Pulitzer-prizewinning work, “Canti Lunatici.” She interrupted 

her DMA studies in violin performance at USC to accept the invitation to join two world-renowned ensembles in Vienna: 

Ensemble Eduard Melkus, and Cappella Accademica Wien. During her ten-year sojourn in Austria, she toured internation-

ally with the Albertina Soloists, a specialized chamber music ensemble with a repertoire spanning five centuries, which she 

founded and directed. Ms. Martino has performed extensively as a soloist and chamber musician throughout the United 

States, Canada, Europe, Asia, and Australia. Recognized as a specialist in early music performance practice as well as 

contemporary techniques, she has not only brought to the public unpublished works from the 16th-19th centuries, but she 

has also commissioned and premiered many pieces by European and American composers. Notable European premieres 

by Ms. Martino include John Adams’ “Road Movies” and Philip Glass’ Violin Concerto (violin-piano version). An interna-

tionally respected art historian and writer, Victoria Martino has curated numerous museum exhibitions and published 

catalogues and essays in six languages. She has taught interdisciplinary courses at several universities, and participated in 

international scholarly symposia and conferences. For several decades, she has presented “lecture-concerts” at museums and 

universities, in which she explores the relationship between art and music through the centuries.

Jonathan Mattson currently is an undergraduate in the Jazz department of UCSD, and has studied under Steven Schick, 

Mark Dresser, Kamau Kenyatta, Anthony Davis, and David Borgo. He is currently performing in a band with his twin brother 

Jared Mattson called The Mattson 2 (Jonathan mattson: Drums, Jared Mattson: Guitar, Loops). The Mattson 2 are on Santa 

Cruz based independent record label ‘Galaxia’, which has released works by Tommy Guerrero, Ray Barbee, and Bonnie 

‘prince’ Billy; to name a few. The Mattson 2 have two record releases from Galaxia: “Introducing”, and a collaboration 

with guitarist Ray Barbee called “Ray Barbee Meets The Mattson 2”; and their newest record “Feeling Hands” is set to be 

released in February 2011. They have also collaborated with artist/filmmaker Thomas Campbell, and The Sea and Cake/ 

Tortoise’s John McEntire. The Mattson 2 has a handful of world tours under their belts: Sao Paulo, Brazil; Copenhagen, 

Denmark; Helsinki, Finland; The Hague, Netherlands; New York City, San Francisco, Los Angeles; and have toured Japan 

6 times.

Andrew May married his UCSD sweetheart Elizabeth McNutt in 2000. They sailed away for ten years and a day to pursue 

academic employment in Starkville, Mississippi (where the bong tree doesn’t grow); Boulder, Colorado (where bongs grow on 

trees) and Denton, Texas (scene of the Rocky Horror Show - a fact kindly provided by Eric Lyon). Andrew became a father 

(and got tenure too, which didn’t seem quite as important) in June 2008. Just like you remember, Andrew is writing lots of 

chamber music and interactive computer music code, playing violin, putting on concerts, and scaring undergraduates with 
his endless digressions.

Colin McAllister. Via a diverse range of musical interests and an uncommon versatility, Colin McAllister maintains an active 

performance schedule throughout the United States, Mexico and Europe. His repertoire spans the gamut of historical pe-

riods and styles: from the late fourteenth-century polyphony of the ars subtilior to recent modernist works. He is especially 

active as an ensemble player and works regularly with many groups, including NOISE (a new music sextet), the SpeakEasy 

Ragtime duo, Delenda Est Carthago, the Sonora Chamber Ensemble and Art of Élan. A passionate advocate for the 

contemporary repertoire, Colin has premiered over fifty new works and has worked closely with many leading composers. 

Recent performances include contemporary music festivals in Germany, Mexico City, Los Angeles, San Francisco, and 

Chicago; jazz festivals in Alaska, Hungary and the Netherlands; and visiting artist residencies at Colorado College and the 

Oberlin Conservatory of Music. He has recorded for the Innova, Albany, Old King Cole, Vienna Modern Masters, Carrier 

and Tzadik record labels, and his transcriptions and compositions are published by Les Productions d’Oz. Upcoming high-

lights for the 2010-2011 season include albus/ater (a solo tour featuring works by Christopher Adler, Matthew Burtner and

Elizabeth McNutt. Since finishing her DMA degree in 2000, Elizabeth McNutt has gotten married; lived in Mississippi, Colorado, and Texas; and worked as a freelance new music flutist, grants writer, music critic, artistic administrator at a university, co-director of a non-profit, private teacher, and CD producer/promoter (see “pipe wrench” at www.emfmedia.org). Elizabeth now juggles her work at the University of North Texas (teaching flute students and composition courses, and directing the new music ensemble Nova) with flute playing and raising her two year old, Henry. Other projects this season include a residency at SARC, and performances in the Calliope Duo, The Tornado Project, and at the Dallas Festival of Modern Music.

Chris Mercer received a B.M. in Composition at the North Carolina School of the Arts in 1995 and a Ph.D. in Composition at the University of California, San Diego in 2003. His principal teachers were Chaya Czernowin and Chinary Ung, instrumental music, and Peter Otto and Roger Reynolds, electronic music. He has held artist residencies at Experimentalstudio SWR, Künstlerhaus Schloss Wiepersdorf, and Sound Traffic Control in San Francisco; his music has been performed by The Nonsense Company, Ensemble SurPlus, SONOR Ensemble, and Schlagquartett Köln. His most recent electroacoustic music and research have focused on animal communication, especially nonhuman primate vocalization, including research residencies at the Duke University Lemur Center, the Wisconsin National Primate Research Center, and the Brookfield Zoo. His instrumental music involves modified conventional instruments, found objects, and instruments of the composer’s own design, in combination with amplification, live electronics, and spatialization. He has taught electronic music at UC San Diego, UC Irvine, and CalArts; he is currently coordinator of the music technology program at Northwestern University.

Susan Moore is currently living in Oakhurst, California, just outside the south gate to Yosemite National Park. She sings with the Sierra Chamber Maids, a group of six women who do accompanied and a capella jazz and music of the 30’s and 40’s. She also sings with the Sierra Chamber Singers, and does solo work. She has performed with Fresno International Grand Opera, and has conducted their children’s chorus; she also works with California Opera as a vocal coach, lecturer, and rehearsal conductor for their children’s chorus. She is the music director at Oakhurst Lutheran Church. She teaches classes in pitch matching, rhythm, and singing for small children in addition to private music lessons.

Mumford is a composer-member of the Washington, D.C. based VERGE Ensemble, which has performed his music many times. Current projects include a new work for solo violin for Dutch violinist Frederieke Saeijis, a new cello piece for Rhonda Rider, and a newly commissioned violin concerto by the Argento Chamber Ensemble and violinist Miranda Cuckson. Mr. Mumford is published by Theodore Presser Co. and Quicklight Music and is represented by Carlson & Carlson Arts Contractors.

Koji Nakano received his Ph.D. in composition from the University of California at San Diego, where he studied with Chinary Ung. In 2008, he became the first composer to receive the S&R Washington Award Grand Prize from the S&R Foun-
...dation, which is awarded to the most talented young artist (in the fields of fine arts, music, drama, dance, photography and film), for his/her contributions to U.S.-Japanese relations. He is a member of the American Music Center, ASCAP, and currently serves as a Fellow Council member of the Virginia Center for the Creative Arts. In 2009, Composer Janet Jieru Chen and Koji co-founded The Asian Young Musicians’ Connection, which promotes new music by commissioning compositions from emerging Asian composers alongside with worldwide professional musicians for its regular concert in Asia and North America. In 2011, the S&R Foundation will present a concert of his music at the John F. Kennedy Center for the Performing Arts in Washington DC. Koji will be Visiting Professor of Composition at the Taipei National University of the Arts in the spring semester of 2011.

János Négyesy. Born in Budapest, Hungary - violinist János Négyesy studied at the Franz Liszt Academy of Music and later at Detmold in Germany. He left Hungary in 1965 and from 1970-74 was concertmaster of the Berlin Radio Orchestra. He lived and worked in Paris, Vienna and New York before joining the UCSD faculty in 1979. Long an advocate of new music, Mr. Négyesy has appeared at major festivals throughout the world and premiered hundreds of new works written specially for him. He also gives master classes worldwide. In addition to performing, recording and teaching he has written a definitive study of contemporary violin techniques. Recently he has been receiving acclaim for his expertise as master of the Mathews’ electronic violin. In addition to his interest in new music, he is an exponent of the standard violin repertoire, as well. http://crca.ucsd.edu/~jnegyesy

Ruth Neville. Pianist RUTH NEVILLE brings a wealth of experience as a performer and interpreter to the works of today’s generation of composers. Committed to exploring alternative directions in keyboard music and comfortable in the world of technology-enhanced and traditional literature for piano, Neville offers a broad spectrum of concert music. Described by the Greenville News as “...a deft, sensitive chamber music player whose idiomatic playing is remarkable for color and control,” her chamber music activities have included residencies at the Ferienkurse fur Neue Musik in Darmstadt and the Bayerische Musikakademie Marktoberdorf. Neville joins with her husband, Daniel Koppelman, to form duo runedako. Together they have presented innovative programs throughout the United States and in Finland, Poland, the Czech Republic, the Netherlands and Ukraine. In addition to their duo compact discs, Neville has recorded for CRI, New World Records, Celestial Harmonies, and Neuma Records. She is a graduate of the University of Michigan (B.M.) Oakland University (M.M.) and the University of California, San Diego (Ph.D.). Currently on the faculty at Furman University in South Carolina, Neville teaches piano and music theory.

Päivikki Nykter. Violinist Päivikki Nykter, a native of Finland, is a graduate of the Sibelius Academy in Helsinki. She has held positions in many orchestras including the Helsinki Philharmonic Orchestra. Ms. Nykter was a founding member of the Finnish contemporary ensemble AVANTI! and has maintained her passion for new music, premiering numerous works written for her. She has worked with such notable composers as Brian Ferneyhough, Roger Reynolds, Will Ogdon, Rand Steiger, Yoji Yuasa, Chaya Czernowin, Kaija Saariaho, Jonathan Harvey and David Burge. Ms. Nykter has appeared as a guest artist in several festivals, including Giacinto Scelsi Festival in New York City, Darmstadt New Music Festival in Germany and International Mountain View Festival of Chamber Music and Song in Calgary, Canada. She is an artistic director of a Chamber Music Concert Series in Lappeenranta, Finland. Ms. Nykter served as an Artist-in-Residence at the University of California San Diego Music Department 1994 - 2006. She is now a freelance violinist maintaining a busy concert schedule. Ms. Nykter has recorded the Complete Violin Duos by Béla Bartók with violinist János Négyesy on Neuma records. The same duo has also recorded seven duos written and dedicated to them on Acourant records. She has also recorded on CRI, Old King Cole and mode labels. Ms. Nykter is also a qualified teacher of the Alexander Technique. The Alexander Technique is a way of becoming more aware of balance, posture and movements in everyday activities. The Technique also helps to maximize performing skills, poise and ease for musicians, actors, dancers and other performing artists.

**Morris Palter.** Born in Canada, Morris performs regularly at festivals and concert halls throughout North America, Europe, and Asia. In 2000, Morris co-founded NOISE (San Diego New Music) and in 2003, founded the “Speak-Easy Duo” with Colin McAllister, a group that frequently appears at various ragtime and jazz festivals. Morris is endorsed by Black Swamp Percussion, Paiste Cymbals and Gongs, and is a Yamaha Performing Artist. He is currently an Assistant Professor of Music at the University of Alaska Fairbanks and can be heard on Sony/BMG, Mode Records, New World Records, Tzadik Records, Innova Recordings, and Vienna Modern Masters. Morris’s solo CD entitled “Remedy” is available through Centaur Records.

**Michael Pelz-Sherman.** Pianist/Composer Michael Pelz-Sherman has been performing professionally on piano, keyboards, and percussion since the age of 16. Since winning first place at a regional High School Jazz Quartet competition in 1980, he has continued to refine his sound, absorbing influences from a massive web of styles and cultures. A graduate of Indiana University and UC San Diego music programs, Michael studied composition with Earl Browne, Donald Erb, Harvey Sollberger, Rand Steiger, Roger Reynolds, and Brian Ferneyhough. While a student at IU, he was awarded 2nd prize in the SCI composition competition for his piece “Earth, Wind, and Wire” for clarinet, percussion, and 2 harps. He played keyboards and wrote music for the Minneapolis Jazz fusion group “Little Green Men”, whose album “Jazz From Mars” won “Best Jazz Recording” at the 1989 Minnesota Music Awards. He also toured the Soviet Union that same year as part of the group “Rockhouse”, backing up vocalist Prudence Johnson. An accomplished software engineer and computer-musician, Michael served as a Musical Assistant at IRCAM in Paris, France in 1992, where he created an original real-time computer-assisted performance system and designed sounds for Netherlands composer Klass Torstensson’s Urban Songs. His compositions have been commissioned and performed at the Crested Butte Music Festival, and he is an active member of the International Society of Improvised Music. Michael's Ph.D. dissertation, “A Framework for the Analysis of Performer Interactions in Improvised Music”, created under the guidance of trombonist/impviser/author George E. Lewis, demonstrates his deep love for and understanding of the history, development, and structure of creative improvised music that has risen out of the fertile soil of American Jazz. Michael currently resides in Cary, North Carolina (USA) with his wife Dori and their three children, where he teaches piano and performs regularly with his trio MPS Trio, combo Unit 7, and blues band A Fifth of Blues.

Shannon Wettstein. Upon graduating in 2000 with a DMA from UCSD, Shannon moved to Minnesota to take a job as professor of piano at Bemidji State University. After receiving both tenure and promotion in 2005, she resigned and joined the internationally acclaimed contemporary ensemble Zeitgeist based in St. Paul, Minnesota. She also performs with flutist Elizabeth McNutt in their duo, Calliope. She stopped counting the number of solo and chamber music works she has premiered many years ago, since it is typically well over 60 new works each year. Shannon’s recent awards include a Minnesota State Arts Council Individual Artist Grant, the American Composers Forum-Jerome Foundation Composer Commissioning Grant, and the Champions of New Music Award, awarded to Zeitgeist by the American Composers Forum. Her recordings are available on Centaur, Tzadik, and Innova. She is currently on the faculty of Augsburg College in Minneapolis. When not at the piano, Shannon enjoys practicing and teaching power vinyasa yoga, cooking and traveling with her husband, Billy, and playing with her two dogs, Oliver and Emma. Calliope is the duo of Elizabeth McNutt, flute, and Shannon Wettstein, piano. The name “Calliope” refers to an innovative American combination of flute and piano, a keyboard instrument that plays a rank of steam-driven pipes. “Calliope” is also the name of the Greek muse of eloquence and epic poetry, an embodiment of the duo’s mission to convey ideas of heroic intensity with beauty and grace. The duo’s repertoire focuses on newly commissioned works and substantial duo literature of the last 30 years. Founded ten years ago while students at UCSD, the duo has performed to acclaim throughout the country, and has presented workshops for composers and performers at colleges, universities and conservatories nationwide.
